What Does The Future Hold For The Gastric Antisecretory Drug Market?

The gastric antisecretory drug market is anticipated to

exhibit solid growth in the forthcoming years, projected to reach \$19.97 billion by 2029 at a CAGR of 6.1%. The future growth is expected to be fueled by a blend of factors such as the rising prevalence of gastrointestinal disorders, an aging population, increased mindfulness about digestive health, expanding healthcare infrastructure, and higher consumption of fast and processed foods. Other major trends in the forecast period encompass widespread use of NSAIDs, availability of over-the-counter antisecretory drugs, advancements in drug delivery systems, availability of generic drugs, and breakthroughs in combination therapies.

What Factors Are Driving The Gastric Antisecretory Drug Market?

One of the key growth drivers of the gastric antisecretory drug market is the escalating prevalence of gastrointestinal disorders. These disorders, affect the digestive tract, which includes the intestines, stomach, and other associated organs, and lead to symptoms like pain, bloating, and altered bowel movements. The surge in gastrointestinal disorders can be attributed predominantly to poor dietary habits, with an excess intake of processed foods and insufficient fiber upsetting the balance of gut microbiota and triggering impaired digestion.

Here, the role of gastric antisecretory drugs becomes critical, as excessive stomach acid can erode the protective lining of the gastrointestinal tract, causing irritation or injury. These drugs help mitigate such damages by curbing acid production. As identified in a report published by ScienceDirect in May 2025, about 23.5 million gastrointestinal endoscopies were performed in 2022. Hence, the rising cases of gastrointestinal disorders are poised to spur the growth of the gastric antisecretory drug market.

Who Are The Key Players In The Gastric Antisecretory Drug Market?

The gastric antisecretory drug market is home to major companies like Pfizer Inc., Bayer AG, AstraZeneca plc, Takeda Pharmaceutical Company Ltd., Sun Pharmaceutical Industries, Dr. Reddy's Laboratories, Chemo Biological, Spansules Pharmatech Pvt. Ltd., Phoenix Biologicals Pvt. Ltd., Centurion Remedies Private Limited, Solitaire Pharmacia Pvt.
