What Are The Key Drivers Propelling [The Growth Of The Dental Restorative Materials Market?](#)

Exponentially increasing dental disorders are projected to foster the growth of the dental restorative materials market further. Dental disorders like tooth decay, periodontal disease, and tooth loss, necessitating restorative interventions to maintain oral function and aesthetics are on the rise due to poor oral hygiene habits, leading to plaque accumulation and bacterial growth. This environment fosters the risk of cavities and other dental issues, causing an uptick in the demand for restorative materials to aid in repairing and managing dental damage. According to the World Health Organization, there were approximately 389,846 new cases and 188,438 deaths worldwide in 2022 due to cancers affecting the lip and oral cavity. Therefore, these disturbances will inevitably spur growth in the dental restorative materials market.
