

Pawscripts Becomes First Veterinary Prescribing Software to Earn Drummond Certification for EPCS

DURHAM, NC, UNITED STATES, June 17, 2025 /EINPresswire.com/ --

Drummond, a trusted leader in health IT testing and certification, is proud to announce that Pawscripts LLC, a provider of Electronic Prescription Software (EPS) for veterinarians, has successfully achieved certification for Electronic Prescribing of Controlled Substances (EPCS). Pawscripts is the first veterinary EPS to earn this designation through Drummond's EPCS Certification Program, setting a new benchmark for security, compliance, and innovation in pet health IT.

Drummond's EPCS Certification Program provides a pathway for software vendors to demonstrate conformance with the DEA's requirements for the digital prescribing of controlled substances. Certification confirms that Pawscripts' EHR platform meets the stringent technical standards required to enable secure, authenticated, and auditable prescription workflows.

"Becoming the first veterinary EPS to achieve EPCS certification through Drummond is a pivotal step for our team and for the veterinary community at large," said Bryan Riensche CEO at Pawscripts. "This certification not only affirms the integrity and security of our solution but also reflects our broader mission to bring modern, compliant digital tools to veterinary clinics nationwide."

EPCS certification enables veterinarians to prescribe controlled substances electronically, replacing outdated expensive and riskier manual processes with secure, compliant, and efficient digital solutions. This advancement supports safer care delivery, while helping veterinarians to meet the demands of their clients and align with evolving pet care standards.

“EPCS certification is a game-changer for veterinary software providers aiming to modernize responsibly,” said Patrick Paschall, Supply Chain Security Business Unit Leader at Drummond. “Pawscripts is leading by example, bringing a new level of security, efficiency, and accountability to veterinarian electronic prescribing.”

With EPCS certification now in place, Pawscripts is uniquely positioned to support veterinary practices seeking digital transformation, increased efficiency, reduction in prescription fraud risks, enriched customer satisfaction, and enhanced regulatory readiness.
