How Has The HPV And CMV Therapeutic Market Grown And What Can We Expect In The Forthcoming Years?

“

It will grow to \$6.89 billion in 2029 at a compound annual growth rate (CAGR) of 8.7%.

”

*The Business Research
Company*

The human papillomavirus HPV cytomegalovirus CMV therapeutic market size has grown strongly in recent years. It will grow from \$4.55 billion in 2024 to \$4.95 billion in 2025 at a compound annual growth rate CAGR of 8.8%. The growth in the historic period can be attributed to the increasing prevalence of human papillomavirus HPV and cytomegalovirus CMV infections, growing awareness of sexually transmitted infections, development of antiviral

drugs and vaccines, rising incidence of human papillomavirus-related cancers, and public health vaccination initiatives.
