

Call My Doctor Launches At-Home STD Testing Service in Dubai

New “STD Test at Home Dubai” service offers confidential, same-day STD screening for Dubai residents, with DHA-certified nurses ensuring medical accuracy.

DUBAI, DUBAI, UNITED ARAB EMIRATES, June 17, 2025

/EINPresswire.com/ -- Call My Doctor Health Care LLC, a leading DHA-licensed home healthcare provider, has announced the launch of its [at-home STD testing service in Dubai](#). Branded as the “STD Test at Home Dubai”

service, this offering allows individuals to arrange a private STD check up in the comfort of their own home or hotel. Available 24/7, the service is aimed at residents who seek accessible, [confidential STD screening in Dubai](#) with the assurance of medical accuracy and full compliance with Dubai Health Authority (DHA) standards. By combining convenience with professional care, the service empowers people to take charge of their sexual health without visiting a clinic, thereby addressing privacy concerns and reducing the hesitation often associated with STD testing.

The new STD screening Dubai service emphasizes discretion at every step. Clients can book a same-day appointment via phone or online, and a DHA-certified medical professional is dispatched – often within 30 minutes anywhere in Dubai – to collect samples privately at the client’s location. “For many individuals, undergoing an STD test at a public clinic can feel intimidating due to stigma or lack of anonymity,” said a spokesperson for Call My Doctor. “Our at-home service provides a private alternative, so patients can get tested with complete confidentiality while receiving the same high standard of care they would expect from a clinic.” All tests are performed by experienced nurses and processed in accredited laboratories, ensuring fast, reliable, and accurate results. In fact, most test results are available within 24 hours, with results delivered securely and accompanied by medical guidance for any necessary next steps. This rapid turnaround meets the growing demand for quick answers in healthcare, all without compromising on privacy or quality.

Key Features and Benefits

The “STD Test at Home Dubai” service introduces several features designed for maximum privacy, convenience, and trust:

Complete Discretion: The entire process – from booking to sample collection and results – is handled with utmost confidentiality. Patients avoid public waiting rooms and can receive their sexual health screening in a familiar environment, alleviating stress and embarrassment.

DHA-Compliant Medical Care: The service is operated by Call My Doctor’s team of DHA-licensed doctors and nurses, adhering to strict medical standards set by the Dubai Health Authority for testing accuracy and safety. This compliance assures that the at-home testing is as credible as hospital-based services.

Same-Day Appointments, 24/7: Clients have access to round-the-clock service, including weekends and holidays. A medical professional can typically arrive within minutes of booking (around 30 minutes on average in Dubai) for urgent requests. This swift response means even those with busy schedules can fit in an [STD check-up Dubai](#) residents might otherwise postpone.

Fast & Accurate Results: The collected samples are analyzed using advanced laboratory diagnostics, with results often ready by the next day. Patients are assured of 100% accurate screenings, as the testing methods can detect infections even in early stages.

Follow-Up Consultation: To support holistic care, the service includes complimentary doctor consultations and guidance. Clients can discuss their results with a physician at no extra cost, and receive a free prescription if treatment is needed – ensuring that those who test positive are immediately connected to proper care and advice.

The introduction of at-home STD testing aligns with Dubai’s broader health strategy to improve access to preventative care. Health authorities have emphasized that regular testing is a critical component of wellness, as sexually transmitted infections can be prevalent even in conservative regions. By offering a home-based sexual health screening option, Call My Doctor is supporting public health goals—making it easier for people to know their status and seek timely treatment. Importantly, STD testing is legal, confidential, and encouraged in the UAE, provided it’s done through licensed providers. Services like Call My Doctor’s ensure that individuals can comply with health advice without fear of exposure or breach of privacy. The company reports that its at-home model has already seen strong interest, particularly among young professionals and couples who value the anonymity and ease of the service.

Call to Action: Dubai residents who wish to book a private STD test at home or learn more about the service can visit the official STDTestInDubai website (stdtestindubai.ae) or call the 24/7

helpline. By taking the step to get tested in a secure setting, individuals are actively prioritizing their health and well-being. "Our message to the public is simple: sexual health is just health. There's no need to put it off – we've made it easy and discreet to get checked, so you can have peace of mind," the spokesperson added.

About Call My Doctor Health Care LLC

Call My Doctor Health Care LLC is a Dubai-based healthcare provider specializing in 24/7 at-home medical services. Licensed under the Dubai Health Authority, the company offers a range of home healthcare solutions – from doctor-on-call visits and lab tests at home to specialized wellness screenings. With a team of highly qualified, DHA-certified doctors and nurses, Call My Doctor is dedicated to delivering fast, reliable medical care with an emphasis on convenience, confidentiality, and patient well-being. The company's mission is to redefine access to healthcare in the UAE by combining clinical excellence with personalized, door-to-door service. Through innovative offerings like the at-home STD testing service, Call My Doctor continues to uphold the highest standards of quality (in line with DHA regulations) and to build trust as a partner in community health.
