

# Aiarty Brings Next-Gen AI 4K Video Upscaling with Pixel-Perfect Details and Unparalleled Clarity

*Aiarty's newly released AI Video Enhancer delivers a next-gen solution that revolutionizes the way users upscale videos to 4K.*

CHENGDU, CHINA, June 17, 2025

/EINPresswire.com/ -- The freshly launched [Aiarty Video Enhancer](#) is sending shockwaves through the industry with its groundbreaking 4X AI video upscaling. Powered by SOTA AI technology, this AI video enhancer intelligently converts low-quality content into pristine HD, 2K, or true 4K resolutions with astonishing fidelity, details, and speed. Gone are the days of distorted artifacts and muddy textures plaguing conventional upscalers – Aiarty meticulously [upscales videos](#) with every sharp detail and natural aesthetic.

This technological breakthrough arrives as content creators and videographers increasingly demand studio-grade results from everyday footage - from polished marketing campaigns to professional video deliveries. Yet, many videos still fall short due to source limitations, whether captured on old camcorders, early mobile phones, heavily compressed files, or outdated formats like VHS and MiniDV. Even modern AI-generated content (AIGC) often caps at 512p or 720p, rendering it unsuitable for commercial or client-facing platforms. Aiarty Video Enhancer is engineered to decisively close this quality gap.

## Upscale Videos with Lifelike Details

Instead of merely stretching or multiplying pixels, Aiarty Video Enhancer leverages state-of-the-art Diffusion and GAN technologies for upscaling. It analyzes patterns and textures of the video frame by frame to restore and generate missing visual information, seamlessly upscaling videos by 2X and 4X to 4K resolutions. As a result, the details in the upscaled videos look crisper and more natural, free from distortion, blur, or artifacts.

4-in-1 Video Upscaler that Perfects Every Pixel

More than just add pixels — it will also reconstruct lost details, reduce noise, sharpen motion blur, and add organic textures. The result is video that doesn't just look bigger, but genuinely better, with professional-grade clarity ready for modern displays.

- Add details - Generative AI techniques to add realistic, organic details like skin, hair, fur, flowers, and fabric.
- Denoise – The superDenoise tech is optimized to remove grain from videos recorded in the extremely low light.
- Deblur – The built-in Deblur algorithms restore and sharpen blurry videos to crystal clarity.
- Depixelate – Eliminate blockiness and bring back clean, natural edges.

### 3 AI Models Trained for Upscaling any Video Type

At its core, three specialized AI models have been rigorously trained on an enormous dataset of 2.38 million real-world and animated videos, plus 120 hours of HD/4K training footage. Each model has been purpose-engineered to handle specific video flaws. This extensive training enables Aiarty Video Enhancer to upscale any low-resolution material that users may have into cinematic, 4K-ready content.

### Upscale at Industry-Leading Speed

Aiarty also leads in video upscaling performance. All its 3 models are finely tuned for [maximum GPU efficiency](#), reaching up to 95% utilization. Standard 1080p to 4K upscaling runs at 21.5 fps, and the Turbo Mode pushes speeds to 31.1 fps — nearly 3× faster than most tools, which often lag at just a few fps.

"We built Aiarty Video Enhancer to help creators finally achieve the 4K quality their content deserves and make old memories shine like new," says Jack Han, CEO at Aiarty. "Our AI doesn't just enlarge pixels; it intelligently restores and refines every detail, delivering true 4K fidelity. This means your content, no matter its origin, will look breathtakingly sharp and natural on any modern screen."

### Pricing and Availability

Aiarty Video Enhancer is available now for both Windows and macOS platforms, with special launch pricing of up to 30% off:

- Lifetime license-3PCs: \$165 (Original price: \$235), with a free gift of Aiarty Image Enhancer.
- 1 Year Stand License-1PC: \$79 (Original price: \$99).

Try it risk-free — download the free trial or get the full version now at: <https://www.aiarty.com/ai-video-enhancer/>

### About Aiarty

Aiarty is the AI-focused innovation brand from Digiarty Software, dedicated to developing cutting-edge multimedia solutions. With a talented team of passionate engineers dedicated to pushing boundaries, Aiarty develops cutting-edge AI tools meticulously crafted to elevate digital experiences worldwide.

## About Digiarty Software

Digiarty Software, the developer of Aiarty, WinX DVD, and VideoProc, is a leading provider of multimedia software solutions for over 18 years. Renowned for their unwavering commitment to quality, performance, and customer satisfaction, Digiarty boasts a diverse software suite encompassing DVD backup, iPhone management, video transcoding, editing, and more. The comprehensive offering has garnered over 256 million software installations across 180 countries. To get more info about the company, please visit its official web page:
