

# DeviQA Launches Academy to Train QA Engineers in AI-Augmented Testing

*DeviQA unveils in-house academy to upskill QA engineers in AI-based testing, intelligent automation, and strategic product quality workflows.*

NEW YORK, NY, UNITED STATES, June 17, 2025 /EINPresswire.com/ -- The [DeviQA Academy](#) is a structured in-house program focused on upskilling engineers in AI-assisted [test automation](#), intelligent QA workflows, and real-world product quality strategy.

“

The Academy helps our engineers think strategically about automation, and learn how to apply AI tools where they actually make an impact - not just follow trends.”

*Dmitry Reznik, CTO & co-founder of DeviQA*

DeviQA, a global leader in software testing and quality assurance, announced the launch of the DeviQA Academy - an internal learning and development initiative focused on training its engineering team in the field of AI-powered software testing.

The program focuses on real-world AI adoption across the QA lifecycle - empowering engineers to lead in high-

velocity product environments by leveraging tools from DeviQA's AI ecosystem.

“We don't just want to grow our internal capabilities - we want to raise the standard across the QA industry,” said Oleg Sadikov, founder & CEO at DeviQA.

A strategic investment in QA talent

The DeviQA Academy is not a generic training library. It's a practical, engineer-driven program developed by the company's senior QA leads to address real client challenges and new testing realities.

Engineers in the program receive hands-on training in:

- AI-based test case generation and optimization
- AI-assisted root cause analysis and bug clustering
- Test impact analysis and intelligent risk coverage
- Using GenAI to reduce test maintenance and flakiness
- Prompt engineering for QA-specific LLM use cases
- Integrating AI into existing CI/CD pipelines and reporting flows
- The program is delivered through internal workshops, peer-led experiments, tool-specific labs,

and live problem-solving on live projects.

- Raising the bar on modern QA

"We've always believed that great QA is about mindset as much as skillset," said Dmitry Reznik, founder & CTO at DeviQA.

"The Academy helps our engineers think strategically about automation, and learn how to apply AI tools where they actually make an impact - not just follow trends."

The initiative reflects DeviQA's long-term commitment to technical excellence, client value, and building a QA culture that evolves with the industry.

#### About DeviQA

DeviQA is a leading provider of software testing and quality assurance services. With 15+ years of experience across 30+ industries, the company helps product teams release faster with confidence through expert automation, [AI-enhanced QA](#), and deep domain expertise.
