By Type, The wide application of specialized metal stents such as self-expandable metal stents (SEMs) in the treatment of biliary comorbidities has fueled the growth of the market. The plastic biliary stents segment is expected to grow at the highest CAGR of 5.8% till 2025. This is due to the cost-effectiveness associated with the product.

By Application, The fact that biliary leaks are one of the most common modalities that are treated using stents has made the segment come out as the largest revenue contributor to the market.

Based on End-User, The availability of trained medical staff in hospitals helps provide better services to the patient which, in turn, has contributed toward the growth of the market. Ambulatory surgical centers has garnered the highest CAGR and this is due to increase in the number of ASCs in the U.S. along with the fact that they provide cost-effective services as well as a convenient environment for surgery.
