

Savant Unveils Summer Release Featuring Agentic Analytics Suite, Anthropic Partnership, and Enterprise Migration Tools

New Agentic Analytics Suite™, AI Innovation, and Migration Tools Help Enterprises Choose the Best Path for Analytics Optimization

SAN MATEO, CA, UNITED STATES, June 18, 2025 /EINPresswire.com/ -- [Savant Labs](#), the leader in AI-powered [analytics automation](#), today launched its Summer 2025 Release, the latest software update utilized by business users and analysts for faster decisioning and insights. The release introduces Savant's first-to-market Agentic Analytics Suite™ and Intelligence Graph™, one-click integration with Anthropic Claude, and migration tools to help enterprises modernize from legacy self-service analytics platforms. As enterprises refine their automation, AI, and agentic strategies, Savant's innovative analytics automation platform provides business leaders with flexibility and control to scale at their own pace and strike the right balance between data freedom and governance.

New Savant Agentic Analytics Suite™

The image displays the Savant Agentic Analytics Suite™ - Fuse Agent interface. At the top, there is a large, stylized logo consisting of two overlapping, rounded rectangular shapes, one light blue and one dark blue. Below the logo, the word "SAVANT" is written in a large, bold, black, sans-serif font. The main part of the interface is a workflow canvas. It shows a sequence of steps: "Legal Names" (with a red icon), "Company Names" (with a green icon), "Fuse Agent for Fuzzy Match" (with a blue icon), "Shine Agent for Data Cleaning" (with a blue icon), and "Email CFO" (with a blue icon). The "Fuse Agent for Fuzzy Match" step is highlighted with a blue border. To the right of the canvas is a "Configuration" panel. It contains a "Description" field with the text "Fuse Agent for Fuzzy Match", a "Which LLM Service would you like to use?" dropdown menu with "Savant Demo" selected, a "Match field" dropdown menu with "values from Legal Names" selected, and a "To field" dropdown menu with "values from Company Names" selected. There are "Apply" and "Cancel" buttons at the bottom of the configuration panel. Below the canvas and configuration panel is a table titled "Preview Fuse Agent for Fuzzy Match (Output 1)". The table has four columns: "As Legal Name", "score", "As Company Name", and "As Company Address". The first row shows "Walmart Inc." with a score of 82, "Walmart", and "14000 N. 19th Ave, Suite 100, Scottsdale, AZ 85255". The second row shows "Amazon.com, Inc." with a score of 82, "Amazon", and "4100 Leeway Pl, Seattle, WA 98148". The table has 20 rows in total, with the first two rows visible. At the bottom of the interface, there is a navigation bar with buttons for "Save", "Settings", "Analysis", and "Gen AI Demo".

Savant Agentic Analytics Suite™ - Fuse Agent

At the heart of the Summer 2025 Release is the groundbreaking Savant Agentic Analytics Suite™, a collection of AI agents that empower business users to delegate routine tasks and workflows to bot-driven AI agents within Savant's integrated platform. As companies strive to optimize efficiency and productivity, the Savant Agentic Analytics Suite™ acts as a force multiplier, automating fundamental yet time-consuming tasks and freeing analysts to work on higher-value

From intelligent agents to enterprise-grade controls and blazing performance, we are rewriting the playbook for enterprise data teams with one of our most innovative releases to date."

Chitrang Shah, CEO and Co-Founder of Savant Labs

initiatives.

Savant's first release of Agentic Analytics Suite offers intuitive, bot-driven agents, including:

- Fuse Agent for fuzzy matching - Unifies disparate data by intelligently identifying and merging similar records across sources
- Infer Agent for data enrichment - Enhances existing datasets by drawing in relevant external information
- Shine Agent for data cleansing - Ensures data quality and accuracy by detecting and correcting errors, inconsistencies, and redundancies

- Glean Agent for insights generation - Extracts meaningful patterns and actionable intelligence from complex datasets
- Vision Agent for OCR and PDF extraction - Converts unstructured visual data into structured, usable information
- Stylus Agent for auto-documentation - Auto-generates summaries and documentation of workflows

Combined with the next-gen Savant Intelligence Graph™, organizations now go beyond basic knowledge graph tools to benefit from Savant's dynamic intelligence layer that iteratively learns and evolves, offering deeper insights and time savings of up to 80%.

"Our Summer 2025 Release is more than a feature drop—it's a full-stack transformation for analytics automation," states Chitrang Shah, CEO and Co-Founder of Savant Labs. "From intelligent agents to enterprise-grade controls and blazing performance, we are rewriting the playbook for enterprise data teams with one of our most innovative releases to date."

One-Click Anthropic Claude Integration

The release includes a native, one-click integration with Claude Sonnet 3.5 (v2) from Anthropic, enabling instant generative AI capabilities directly within the Savant environment. Unlike API-based approaches that require complex integration, Savant users can instantly invoke Claude to clean data, enrich master records, and run sentiment analysis in a spreadsheet-like interface. In quick, easy steps, business users can transform every row into a powerful LLM prompt for generative AI that is governed, guided, and enterprise-ready.

"Using Savant's generative AI capabilities offers Arrive faster time to data insights and hours saved on manually analyzing and cleaning data," states Layla Martin, Director of Data and ML Engineering, Arrive Logistics. "We're also streamlining knowledge sharing across data warehouse users by ensuring documentation on data assets and data pipelines is always present."

Engineered for Speed: Lightning Compute + SQL Pushdown

To support high-volume, high-velocity use cases, Savant has advanced its Lightning Compute Engine and High-Performance SQL Pushdown Engine to supercharge data processing:

- Run massive pipelines 10x faster in memory
- Delegate heavy-compute tasks directly to Snowflake, Databricks, BigQuery, and others
- Slash time and cost of 10-billion-row queries from hours to minutes

Enterprise-Grade Governance and Control

Enterprises seeking greater control can take advantage of new workflow enhancements such as Smart Pausing™ and Advanced Automation Controls, while leveraging Tableau and OneDrive Orchestration Optimizers. These updates are designed to ensure workflows are always performant, stable, and compliant, no matter how large your scale or user base.

Workflow Migration Made Easy

For enterprises transitioning from on-premise self-service analytics platforms or legacy systems, Savant introduces its Workflow Transformer application, supporting migration from a wide range of platforms and configurations, including Alteryx to Savant. The application preserves existing workflows from one platform, then recreates them in Savant whole, drastically cutting workflow steps by 50%. The Workflow Transformer tool helps companies accelerate their digital transformation initiatives such as moving from on-prem to cloud; ensures a future-proof pathway to leverage Gen AI and agentic capabilities when ready; improves resource optimization; and significantly lowers total cost of ownership by eliminating per-seat and server costs with Savant's consumption-based model.

Savant Summer Release is available immediately.
