

Intrinio expands global ETF data suite, bringing institutional-grade coverage to fintechs & financial institutions

The expanded EFT data suite offers 19,000+ funds across 98% of global markets—built for fintech scale, institutional depth, and real-time strategy.

ST. PETERSBURG, FL, UNITED STATES, June 19, 2025 /EINPresswire.com/ -- Intrinio, a leading financial data provider on a mission to make market intelligence more affordable and accessible, today announced the launch of its expanded [Global ETF Data Suite](#), offering unmatched coverage of more than 19,000 ETFs worldwide—now available via Intrinio's modern, developer-friendly platform.

This launch further strengthens Intrinio's commitment to democratizing high-quality financial data and equipping both fintech innovators and institutional investors with the [powerful tools](#) they need to build, scale, and optimize data-driven strategies.

"Our goal has always been to remove the friction, bureaucracy, and bloat that makes accessing financial data so difficult," said Rachel Carpenter, CEO of Intrinio. "With the addition of comprehensive global ETF coverage, we're putting another powerful dataset directly into the hands of the people building the future of investing—from agile fintech teams to sophisticated investment platforms."

Unmatched global ETF coverage

Intrinio's new ETF offering, powered by longtime partner CFRA, includes:

19,000+ ETFs across 98% of global markets, including U.S., Canada, Europe, Asia, and Latin America

Complete U.S. ETF holdings, with anchored historical data and strategy-level transparency

Daily fund flows, performance metrics, and trading data, all standardized for easy use

Classification across 300+ granular ETF categories, driven by over 100 unique factors and themes

This expansion ensures that Intrinio clients—from asset managers and analysts to next-gen

investment apps—have direct access to the most actionable ETF data available on the market.

A data suite built for scale and speed

The Global ETF Data Suite is available via Intrinio's modern delivery methods, including:

Realtime and historical data APIs

Bulk downloads via CSV and S3

Direct integrations into tools like Snowflake and Python environments

"We're proud to continue our strong relationship with CFRA to bring this powerful data to a wider audience," said Carpenter. "It's part of our broader mission to level the playing field—helping our clients innovate faster, grow smarter, and gain the global insights they need to compete."

For innovators, by innovators

The Global ETF Data Suite complements Intrinio's growing portfolio of institutional-grade datasets, including:

U.S. fundamentals

Real-time and historical stock prices

Options market data

News & corporate actions

And more

As the ETF market rapidly expands—surpassing \$14.9 trillion in assets globally—this new coverage ensures Intrinio users can stay ahead of trends, benchmark intelligently, and dive deep into global exposure analytics.
