The [Risk.net Japanese edition](https://www.risk.net/ja) aims to empower professionals by exploring critical topics, assessing their implications, and engaging with practitioners, regulators and stakeholders to produce comprehensive analytical content. With this launch, Risk.net reinforces its commitment to making cutting-edge news and in-depth analysis accessible to a broader audience.

Key benefits of the Risk.net Japanese edition for subscribers:

- Enhanced accessibility: complex financial and risk management concepts are presented in Japanese, simplifying expert insights and analysis for easier understanding and implementation.
- Widened perspective: subscribers gain access to a blend of global intelligence and localised insights, offering a holistic view of the global economy while emphasising regional relevance.
- Competitive awareness: Risk.net provides timely updates on market trends and developments in risk management and regulation in Japanese. This vital information enables subscribers to stay informed about the competitive landscape and respond proactively to changes affecting their organisations.

- More informed decision-making: with in-depth analysis and expert insights available in their native language, subscribers are empowered to make informed decisions regarding risk management practices tailored to their specific regions.

What Risk.net's Japanese edition covers:

- Risk management: articles focused on the measurement, modelling, and management of financial risks, covering banks and other financial services firms, including asset managers and insurers.
- Markets: in-depth coverage across derivatives, interest rate, credit, foreign exchange, and structured products asset classes, with a primary focus on over-the-counter markets.
- Regulation: topical news and analysis on the implications of regulation affecting risk transfer and management for banks and buy-side firms, including prudential and macroprudential regulation.
- Investing: coverage from the buy-side perspective, focusing on how institutions manage and match their assets and liabilities.
- Risk Quantum: Tracking public disclosures of more than 120 banks and 14 central counterparties, enabling subscribers to monitor competitor activity and respond to market changes.

With the launch of the Japanese edition, Risk.net positions itself as the only dedicated Japanese language product serving risk management professionals in Japan, ensuring they have access to the trusted insights and analysis that Risk.net is known for, now in Japanese.

The Risk.net Japanese edition is available on a subscription basis. For more information, visit <https://subscriptions.Risk.net/ja>.
