Primary Ovarian Insufficiency Global
Market Report 2025 – Market Size,
Trends, And Forecast 2025-2034*

LONDON, GREATER LONDON, UNITED
KINGDOM, June 19, 2025

/EINPresswire.com/ -- How Has The
Primary Ovarian Insufficiency Market
Size Progressed Over The Years?

The primary ovarian insufficiency market size exemplified a notable upswing in recent years. From \$1.07 billion in 2024, the market is set to burgeon to \$1.18 billion in 2025, marking a Compound Annual Growth Rate CAGR of 10.1%. Factors like increasing incidents of autoimmune disorders, escalating stress levels, growing number of genetic mutations, and a higher prevalence of endocrine disorders contribute to this growth. Additionally, a shift in societal norms leading to more women delaying childbirth also plays a significant role.

What Drives The Growth Of The Primary Ovarian Insufficiency Market?

The increasing prevalence of autoimmune disorders emerges as a potent propellant for the primary ovarian insufficiency market. Autoimmune disorders manifest when the immune system inadvertently attacks and damages the body's own tissues and cells. Individuals genetically predisposed to immune system malfunctions are at a heightened risk, often inheriting specific genes that increase their susceptibility. Remarkably, primary ovarian insufficiency POI can provide valuable insights into autoimmune disorders by unraveling the intricate interactions between hormonal imbalances and immune system dysregulation. It is providing a new lens to view the heightened risk of autoimmune diseases in affected individuals.
