Prime determinants of growth

The global alternative investment funds (AIFs) market is experiencing growth due to global economic growth, technological advancements, digital transformation in the financial sector, and the growing demand for capital raising. However, regulatory constraints and compliance requirements concerns hinder the market growth to some extent. Moreover, expansion into emerging markets with untapped potential and growing economies offers remunerative opportunities for the expansion of the global alternative investment funds (AIFs) market.

The private debt fund segment is expected to experience the fastest growth rate throughout the forecast period

Based on type of funds, the private debt fund segment is expected to experience the fastest growth rate throughout the forecast period, owing to the increasing demand for direct lending, where funds provide loans directly to mid-sized and smaller companies, filling the financing gap left by traditional banks due to stricter regulations and risk aversion. This direct lending is often more flexible and faster, making it attractive to businesses seeking capital. Additionally, private debt funds are diversifying their strategies, including mezzanine financing, distressed debt, and

special situations, to cater to a broader range of risk-return profiles and investor preferences.

The institutional investors segment is expected to experience fastest growth throughout the forecast period

Based on investor type, the institutional investors segment is expected to experience the fastest growth rate throughout the forecast period, owing to shift towards co-investment and direct investment opportunities. Institutional investors are increasingly seeking co-investment arrangements alongside established alternative asset managers, allowing them to access larger deals and potentially reduce fees. Direct investments in private companies or real estate projects offer greater control over investment decisions and potential cost savings compared to traditional fund investments.

Asia-Pacific to maintain its dominance by 2032

Based on region, Asia-Pacific held the highest market share in terms of revenue in 2023, accounting for three-fourths of the global alternative investment funds (AIFs) market revenue and is expected to remain dominant throughout the forecast timeframe, owing to the rising prominence of private equity and venture capital investments. There is a robust demand for capital among emerging businesses and startups as economies in Asia-Pacific continue to expand rapidly. Private equity and venture capital funds provide crucial funding for these enterprises, driving innovation, job creation, and economic growth across the region.
