- Since announcements of the Covid-19 outbreak as a pandemic, several countries across the globe adopted lockdown and asked to observe social distancing as a preventive measure to curb the spread. This resulted in decline in logistic services.
- On the other hand, the majority of the healthcare professionals and systems focused their attention on treating Covid-19 patients. Thus, most of the HSDD patients had to reschedule their doctor appointments.

The market is divided into hospitals, clinics, and internet retailers based on the sales channel. In 2019, the hospitals sector led the market, accounting for nearly 50% of the total. However, the sector for clinics is anticipated to experience the highest CAGR of 6.7% over the course of the forecast period.

The treatment market for LATAM women with hypoactive sex desire disorder is examined across a number of areas, including Brazil, Argentina, Chile, Colombia, and the rest of LATAM. In 2019, the Brazilian market, which made up more than one-third of the market, held the largest stake. But from 2020 to 2027, the market in all of Argentina is anticipated to grow at the greatest CAGR of 7.7%.

Lockdowns had an adverse impact on every type of business in Latin America. For instance, non-essential businesses such as retail business that operate with a physical location with access to public were closed. Furthermore, non-essential construction was also halted, recreational and entertainment businesses such as gyms, movie theaters, art centers, race tracks, salon, and public & private social clubs were also closed under the lock downs. However, essential businesses such as grocery stores, chemist stores, hospitals, veterinary hospitals remained functional during lockdowns.
