

Gaggle Social Redefines Enterprise Application Networking: Jared Tang Shares Vision with Xraised

NEW YORK, NY, UNITED STATES, June 20, 2025 /EINPresswire.com/ -- A New Era for Tech Professionals

Enterprise application professionals have long faced challenges navigating scattered platforms, inefficient hiring models, and limited access to real opportunities. In an exclusive interview with [Xraised](#), Jared Tang, a visionary leader behind [Gaggle Social](#), revealed how the platform is transforming the way tech talent networks, learns, and grows within the enterprise space.

A Purpose-Built Platform for Growth

“Professionals today don’t have time to sift through thousands of unrelated posts or job listings,” Tang explained. Gaggle Social was designed from the ground up to address this. It provides a dedicated ecosystem focused solely on enterprise application professionals, giving them direct access to relevant projects, curated communities, and targeted business development opportunities.

Removing the Middleman for True Empowerment

Traditional hiring models often rely on recruiters and intermediaries who dilute the power of direct communication. Gaggle Social flips this approach. The platform’s nontraditional model empowers users to negotiate and connect directly with hiring managers, collaborate on contracts, and form meaningful professional relationships that reflect real value.

Tech Talent Marketplace That Works

One standout feature is Gaggle’s Skills Matrix—a streamlined, editable table that enables professionals to showcase their skills at a glance. Combined with a built-in service hub for time tracking and invoicing, users can manage entire projects from within the platform. This seamless integration of job searching, talent showcasing, and project management makes Gaggle Social a robust tech talent marketplace.

Driving Innovation Through Community

“Much like a gaggle of geese, our users support one another,” Tang noted. “Our platform thrives on community energy.” Gaggle Social fosters that spirit with advisory boards for each tech vertical, ensuring that users feel represented and that their feedback drives the platform’s evolution. This emphasis on collaboration echoes in community groups, training programs, and exclusive content hubs that keep users ahead of the curve.

Backed by Data and Built for Efficiency

Gaggle Social isn’t just theoretical. Data from the platform reveals that 98% of talent users and 100% of surveyed channel partners are actively seeking more effective ways to network and find work. The feedback confirms that Gaggle’s targeted, user-first ecosystem is exactly what enterprise professionals have been waiting for.

Charting a New Course in Business Development

With enterprise application networking evolving rapidly, platforms like Gaggle Social are becoming critical to staying relevant. As Tang emphasized in the interview, “If technology is always advancing, the way we connect, hire, and grow should evolve with it.” Gaggle Social isn’t just a tool—it’s the foundation for the next generation of tech career development.
