

# Accelerate Development Securely: CloudIBN's DevSecOps-Aligned VAPT Services for US Teams

*Accelerate secure development with CloudIBN's DevSecOps-aligned VAPT services for US teams. Ensure security at every stage without slowing down.*

MAIMI, FL, UNITED STATES, June 20, 2025 /EINPresswire.com/ -- In the high-speed world of software development, security can't be an afterthought. To help US development teams build and deploy secure applications without slowing down delivery, CloudIBN introduces its DevSecOps-aligned VAPT Services. These services integrate seamlessly into development workflows, empowering engineering teams to catch and fix vulnerabilities early—maximizing efficiency, reducing costs, and accelerating secure innovation.

CloudIBN - VAPT Services

## Why DevSecOps Requires Integrated VA & PT Services

With continuous delivery and agile development now the norm, traditional security testing models often fail to keep up. Delayed security assessments can derail releases, lead to post-deployment vulnerabilities, and increase remediation costs.

CloudIBN's DevSecOps-aligned VA & PT Services solve these challenges by embedding security directly into the software development lifecycle (SDLC), enabling:

1. Early vulnerability identification and remediation
2. Continuous security validation throughout builds and releases
3. Real-time feedback loops between developers and security experts
4. Enhanced collaboration across Dev, Sec, and Ops teams
5. Reduced risk of high-impact security flaws post-deployment

Want to build secure software without slowing down? Connect with CloudIBN to embed VA & PT Services into your development workflow: <https://www.cloudibn.com/contact/>

### CloudIBN's VAPT Process for DevSecOps Teams

CloudIBN's VA & PT Services are designed to support fast-paced, iterative development environments. Their approach includes:

1. Integrated Testing: Embedding automated vulnerability scanning into CI/CD pipelines
2. Manual Penetration Testing: Periodic expert-led deep dives to uncover complex flaws
3. Secure Code Review: Evaluating source code and third-party components for weak spots
4. Prioritised Fix Guidance: Actionable reports delivered in developer-friendly formats (e.g., Jira integration, Git-based comments)
5. Ongoing VA & PT AUDIT Services: To ensure compliance with regulatory standards and internal security policies

Whether your team uses Jenkins, GitHub Actions, GitLab CI, or another platform, CloudIBN adapts VAPT workflows to fit your tools and timelines.

### Why CloudIBN is Ideal for Development Teams

US development teams choose CloudIBN because of:

1. DevSecOps Expertise: Deep understanding of agile and CI/CD methodologies
2. Automation-First Strategy: Speedy integration into existing pipelines without bottlenecks
3. Tailored Testing: Focused assessments that align with development priorities
4. Compliance Coverage: Built-in VA & PT AUDIT Services for frameworks like SOC 2, ISO 27001, HIPAA, and more
5. Developer Enablement: Guidance designed for developers, not just security pros
6. This allows developers to focus on innovation, while CloudIBN ensures the code is secure.

Looking to scale DevSecOps without compromising security? CloudIBN has you covered. Let's talk: <https://www.cloudibn.com/lp/pr-vapt-services-in-usa/>

### Benefits for US Development-Focused Companies

CloudIBN's DevSecOps VA & PT Services help teams:

1. Ship secure software faster
2. Cut security remediation costs by addressing flaws early
3. Improve cross-functional collaboration and response time
4. Strengthen compliance posture without interrupting development cycles
5. Reduce risk exposure from open-source vulnerabilities and insecure APIs

Security shouldn't slow your team down—it should accelerate your ability to innovate.

CloudIBN's DevSecOps-ready [VAPT Audit Services](#) empower US development teams to deliver secure, compliant software faster and more efficiently. With integration-ready tools, expert testing, and actionable guidance, CloudIBN helps you reduce risk and release with confidence. Take the next step in secure software delivery — contact CloudIBN and bring DevSecOps security testing into your workflow.
