

Shaip Expands GenAI Data Capabilities Amidst Growing Demand for Stable, Scalable Partners

Shaip scales GenAI data capabilities with multi-modal, gold-standard datasets to meet rising demand for reliable, enterprise-grade AI solutions.

LOUISVILLE, KY, UNITED STATES, June 24, 2025 /EINPresswire.com/ -- As the AI industry undergoes rapid evolution, organizations are increasingly seeking dependable, enterprise-grade partners to power their GenAI strategies with high-quality, diverse, and scalable training data. In response, Shaip is significantly expanding its data infrastructure and offerings—fortifying its position as a leading provider of secure, multi-modal AI datasets and end-to-end [GenAI services](#).

Shaip Logo 1

AI Data Platform 1

Shaip's platform is purpose-built for enterprise AI and offers:

- [Multi-modal data](#) coverage across text, audio, image, and video
- End-to-end GenAI services, including RLHF, prompt ranking, summarization, alignment, content comparison, and QA workflows
- A global workforce of 500,000+ trained annotators, fluent in 50+ languages and specialized across healthcare, legal, technical, and conversational domains.

Shaip also offers a readily available, [gold-standard dataset](#) across key GenAI domains:

- Healthcare: 30M+ de-identified patient notes across 30+ specialties, 280K+ hours of doctor-patient conversations, 30K+ clinical documents with entity and relationship annotations, and over 1M medical images (MRI, CT, X-rays)
- Conversational AI: 140K+ hours of speech data in 70+ languages, including wake-word detection, IVR, scripted and spontaneous speech, utterances, TTS, and multi-speaker interactions
- Computer Vision: 60K+ food and document images, and 50K+ facial recognition and anti-spoofing datasets

With AI evolving rapidly, companies are rethinking how they source training data,” said Hardik Parikh, Co-Founder & CRO, Shaip. “We built Shaip to deliver trusted, scalable data solutions.”

Hardik Parikh, Co-Founder & CRO, Shaip

“With the AI landscape evolving so quickly, companies are re-evaluating how they manage and source critical training data,” said Hardik Parikh, Co-Founder and CRO of Shaip. “We’ve built Shaip to be the go-to data platform for organizations that demand transparency, compliance, and precision—at scale.”

Shaip’s AI data platform empowers teams to accelerate development timelines, enhance model accuracy, and maintain control over sourcing, quality assurance, and delivery—all with full auditability and enterprise-grade security.

Companies looking to enhance or stabilize their GenAI

data pipelines can engage with Shaip through customized pilots and domain-specific solutions designed to support responsible, scalable AI development.
