

# SSL VPN Market Growing at a CAGR of 10.9% and is projected to reach \$12.6 billion by 2030

*Rising demand for secure remote access, cloud security, and BYOD adoption is fueling growth in the global SSL VPN market.*

WILMINGTON, DE, UNITED STATES, June 20, 2025 /EINPresswire.com/ -- According to the report, the global [SSL VPN market](#) was pegged at \$3.45 billion in 2017 and is projected to \$5.33 billion by 2023, registering a CAGR of 7.5% from 2017 to 2023.

Rise in demand for secure remote access for employees, customer, & business, growing incidences of cyber-attacks, surge in demand for cloud-based security solutions, and increase in BYOD trend have boosted the growth of global SSL VPN market. However, the vulnerability of SSL protocol to external threats and lack of host security software installments on endpoint devices hamper the market growth. On the contrary, growing awareness about data security among organizations is expected to create lucrative opportunities in the near future.

The global SSL VPN market is in its developing phase, and exhibits high growth potential, due to new features and services provided by the key players in the market. For instance, in March 2021, Cisco Systems, Inc., an American multinational technology conglomerate corporation, launched Cisco Plus to provide new flexible buying and consumption models to clients to enable them connect, protect, and automate to accelerate their digital agility in a cloud-first future. In addition, the demand for low-cost, convenient, and flexible security solutions and increase in awareness about IT security fuel the adoption of SSL VPN solutions and services among enterprises.

Companies urged employees to set up remote working capabilities in the wake of the spreading

pandemic in order to ensure business continuity. The rise of teleworking, work-from-home, and remote workers poses a significant threat to most businesses' cybersecurity infrastructure. As work from home (WFH) became the new normal, businesses began to use secure sockets layer VPN to connect remote users to corporate resources and access important network resources remotely. Access, security, and performance were all in high demand. Thus, these factors promote the growth of the global SSL VPN industry during the pandemic situation.

The global SSL VPN market is segmented on the basis of mode of remote access, component, organization size, and geography. Based on the mode of remote access, the market is divided into clientless, thin-client, and tunnel. The tunnel mode segment held the largest share in 2017, contributing nearly two-fifths of the total market. However, the thin-client mode segment is projected to 8.0% during the forecast period.

On the basis of the component, the market is divided into software and services. The software segment dominated the market 2017, contributing nearly two-thirds of the market. However, the services segment is estimated to register the fastest CAGR of 8.6% through 2023.

Based on the organization, the market is segmented into large and small & mid-size. The large organization segment held the lion's share in 2017, accounting for more than three-fifths of the market. However, small & mid-size organization segment is projected to portray the fastest CAGR of 8.1% during the study period.
