

Rider Safety in Focus: Motorcycle Airbag Market to Surge from USD 0.46B in 2025 to USD 1.07B by 2035

surge in demand for advanced safety system, and development of selfcontained airbag jackets are anticipated to boost the growth of the global market

WILMINGTON, NEW CASTLE, DE, UNITED STATES, June 23, 2025
/EINPresswire.com/ -- Allied Market
Research has recently published a comprehensive study titled,
*"000000000 000000 000000 00

00 000000 0000000 000000 000 0000 : https://www.alliedmarketresearch.com/request-sample/8872

There are prominent key factors that drive the growth of the motorcycle airbag market, such as increase in number of road accidents, increased demand for advanced safety system, and development of self-contained airbag jackets. The market economy is also responsible for the growth of the market. Countries such as China, India, Brazil, and South Africa are developing economies. Thus, the manufacturing sector witnesses prominent growth in these countries, which is expected to provide lucrative opportunities for the growth of the automotive industry which in turn is expected fuel the market. Also, in some undeveloped countries, there is an increase in the vehicle sales, which is expected to boost the market.

Major determinants of the market growth

Increase in number of road accidents, rise in demand for advanced safety systems, and development of self-contained airbag jackets are expected to boost the growth of the global motorcycle airbag market. However, high initial investment and software failures associated with sensors hinder the market hinder the market growth. On the contrary, growth in awareness from customers for protective gears and surge in demand for bike taxi services would open new opportunities in the future.

The airbag segment to dominate the market

The neoprene coated segment to manifest the highest CAGR through 2035

By coating, the neoprene coated segment is projected to register the highest \$\textstyle{1}\$\textsty

The OEM segment to hold the lion's share

By sales channel, the OEM segment is expected to hold the largest share in 2025, contributing to nearly 90% of the global motorcycle airbag market, as OEMs are coming up with the advanced crash sensors and ECUs as a standard function in their vehicles. In addition, the segment is expected to maintain its dominant position during the forecast period. However, the aftermarket segment would showcase the highest CAGR of 11.9% during the forecast period, owing to growth in popularity of the airbag jackets and vests among the vehicle owners for safe drive.

By nylon segment to showcase the highest CAGR by 2035

By fabric type, the nylon segment is projected to register the highest \$\times\$ \times\$ \$\times\$ \times\$ \times\$ accounting for more than half of the global motorcycle airbag market, and will continue to dominate the market in terms of revenue throughout the forecast period. This is due to increase in adoption of nylon because of its high tensile strength, high elasticity, and superior abrasion resistance. The report includes analysis of the polyester and others segments.

North America held the largest share

By region, the global motorcycle airbag market across Asia-Pacific would hold the largest share in 2025, accounting for nearly two-fifths of the market, and will continue to maintain the leading position during the forecast period. Furthermore, the region expected to showcase the highest \$\Bigcup \Bigcup \Big

KEY FINDINGS OF THE STUDY

By components, the crash sensor segment is expected to register a significant growth during the forecast period.

By coating, the neoprene coated segment is projected to lead the global motorcycle airbag market

By sales channel, the aftermarket segment is projected to lead the global market By fabric type, the nylon segment is projected to lead the global motorcycle airbag market Region-wise, Asia-Pacific is anticipated to register the highest CAGR during the forecast period.
