

# AI Text Generator Market Projected to Reach \$2.2 Billion by 2032, Driven by 18.2% CAGR

*The AI text generator market grows due to rising NLP adoption, demand for quality, cost-effective content tools, and increased chatbot use.*

WILMINGTON, DE, UNITED STATES, June 23, 2025 /EINPresswire.com/ -- AI text generators produce texts in just a few seconds. This tool's time- and money-saving features are anticipated to accelerate the industry's growth. In addition, large media organizations employ artificial intelligence (AI) text generators as adaptable tools for a variety of tasks like composing blog posts, webpage content, articles on various subjects, and more.

Moreover, AI text generators produce texts from organized big data; they may identify patterns and trends based on previous human writing and offer fresh ideas to produce more, and occasionally even better, messages. In order to achieve this, the AI gathers a ton of data from already existing stuff, including websites, search engines, and even online movies.

According to the report, the global [AI text generator market](#) generated \$423.8 million in 2022 and is anticipated to generate \$2.2 billion by 2032, witnessing a CAGR of 18.2% from 2023 to 2032.

Growing trends in Natural Language Processing (NLP) technology and rising demand for cost-effective and quality content generator tools propel growth of the global AI text generator market. In addition, increasing demand for personal assistants and chatbots fuels the growth of the market. However, ethical and legal concerns as well as data privacy and security issues are expected to impede the market growth. In contrast, the rise in the adoption of multi-modal text generation is expected to provide lucrative opportunities for the market during the forecast

period.

## Covid-19 Scenario

1. The AI text generator market witnessed stable growth during the COVID-19 pandemic, owing to an increase in the adoption of digital and remote research technologies as schools and universities went online during the pandemic situation.
2. In addition, the COVID-19 pandemic resulted in the deployment of technology across various academic institutions for online classes and learning, which, in turn, drove the development of advanced machine-learning models.
3. Moreover, the growing demand for the AI text generator market in healthcare education and learning and increasing application in healthcare diagnosis and screening is expected to boost the market growth in the post-pandemic.
