

AGAT Unveils Free Personal BusinessGPT AI Chatbot Powered by Local AI Models Running Within a Browser Extension

AGAT launches Personal BusinessGPT, a free, offline AI chatbot that runs in your browser, no internet, no cloud, no tracking. 100% private, secure.

JERUSALEM, ISRAEL, June 24, 2025

/EINPresswire.com/ -- AGAT Software

proudly announces the launch of BusinessGPT's Personal Local AI Chat—a free, privacy-first AI chatbot extension that runs directly in your browser without any internet connection or cloud processing.

Powered by a locally embedded model, the chatbot processes all data on the

user's device, ensuring complete data privacy with no need for internet access, external APIs, or cloud-based processing.

The solution leverages modern browser capabilities to run AI models directly using JavaScript with near-native access to CPU and GPU resources. This breakthrough enables seamless, real-time interactions without compromising user privacy.

“

This is a breakthrough in private, on-device AI. We're giving users full control—offline access, zero tracking, and intuitive functionality, all with complete data privacy.”

subscriptions, or sign-ups required.

Unified Communications & Collaboration software provider

Privacy First AI Platform

Top Features of the Personal Local AI Chat:

- Privacy-first Local AI: All prompts and responses are handled on your device. No data ever leaves your browser.
- No cost, no sign-up: Unlimited usage—no fees,

- One-Click Install: Quick and easy setup. No infrastructure or third-party tools needed.
- Model Options: Choose from built-in models like Llama-1.2-1B, Hermes-2-3B, or Model-3-3B for tailored performance.
- Works Offline – Use it anywhere, anytime, even without an internet connection.

Benefits:

- Boost Productivity: Summarize articles, write and edit content, generate code, plan trips, or get real-time insights—without ever switching tabs or going online.
- Native Browser Experience: Works directly inside your browser without switching apps.
- Offline Access: Use the chatbot even without an internet connection—ideal for travel, remote work, or high-security environments.

Private AI, For Everyone

The Personal Local AI Chat is designed for anyone who values privacy. It offers a fast, secure, and intuitive way to interact with AI—right from your browser. Whether you're summarizing content, generating ideas, or answering questions, all data stays on your device, ensuring complete confidentiality.

Installation is effortless with a single click— easily installed in one click— No need for external infrastructure or platforms like Ollama.

The extension is available completely free of charge, reflecting BusinessGPT's commitment to empowering individual productivity and offering a gateway into its broader enterprise-grade privacy solutions.
