

Mayfield Environmental Solutions CEO Featured on Jason Alexander Show to Discuss Palisades & LA Wildfire Recovery

LOS ANGELES, CA, UNITED STATES, June 23, 2025

/EINPresswire.com/ -- Mayfield Environmental Solutions, a leader in post-disaster environmental cleanup, proudly announces that its CEO was recently featured on the acclaimed podcast and radio show [“Really? No, Really?” by Jason Alexander and Peter Tilden](#), in the episode titled “After Disasters: Making Homes Safe Again.” The show explores the extensive cleanup, remediation, and rebuilding efforts following the devastating January 2025 Palisades and broader Los Angeles wildfires.

Episode Insights: The CEO shared in-depth perspectives on Mayfield Environmental Solutions’ role in [hazardous debris removal](#), soil testing for toxic contaminants, and ensuring air and water quality in affected communities.

Discussions included strategies for deploying specialized equipment to manage wildfire ash, lead, asbestos, and other post-fire pollutants.

“

Recovery isn’t just about rebuilding - it’s about building back smarter,”

James Mayfield, CEO of Mayfield Environmental Solutions

He also addressed logistical challenges—such as coordinating with municipal authorities in Pacific Palisades and Malibu—to restore neighborhood safety.

The January 2025 southern California wildfires destroyed over 6,800 structures in Pacific Palisades alone and burned more than 23,400 acres during a 24-day inferno. Experts have criticized rapid rebuilding efforts that prioritize speed over resilience. In this conversation, Mayfield’s leadership

emphasized the importance of not just cleanup—but cleanup embedded with fire-resilient design and materials to better prepare communities for future threats.

“Recovery isn’t just about rebuilding - it’s about building back smarter,” stated James Mayfield,

CEO of Mayfield Environmental Solutions. "Our work ensures that communities emerge safer and more resilient, not just restored to pre-fire conditions but fortified against the next one."

Mayfield Environmental Solutions

Mayfield Environmental Solutions is a full-service environmental remediation firm specializing in disaster recovery, industrial cleanup, and regulatory compliance. Based in the South Bay and Harbor regions of Los Angeles County, California, with deployments across the country, Mayfield combines cutting-edge technology and proven methods to deliver safe, effective, and sustainable outcomes.
