

# Cognisense Launches Investigative Compliance Initiative Amid Surge in AI-Driven Training Fraud

*Cognisense unveils newsletter exposing AI-aided training fraud and compliance failures. Subscribe for real-world insights and risks.*

CALGARY, CANADA, June 23, 2025

/EINPresswire.com/ -- [Cognisense](#), a leading authority in risk intelligence and training verification, announced today a major initiative to expose and address vulnerabilities in digital compliance systems. Amid a surge in AI-assisted cheating and growing concerns about the integrity of corporate training, the company is launching [Cognisense Insights](#) — a new investigative content track and biweekly gated newsletter.

“

The tools designed to verify knowledge and ensure compliance are now being outsmarted — often by AI”

*Robert Day*

This initiative will focus on four critical areas of risk and intelligence:

Training System Exploits: How commonly used training and testing platforms are being gamed, exposing organizations to compliance breakdowns.

Real-World Case Studies: A behind-the-scenes look at actual compliance failures — and the systemic blind spots that caused them.

Regulatory Focus Areas: Forward-looking insights into where regulatory bodies are tightening expectations next.

The AI Threat Landscape: How generative AI is accelerating fraud, eroding trust in self-paced training, and forcing a rethink of digital due diligence.

“The tools designed to verify knowledge and ensure compliance are now being outsmarted — often by AI,” said Robert Day, Managing Director at Cognisense. “We’re seeing training platforms passed by bots, credentials issued with no real oversight, and a false sense of security across industries. With Cognisense Insights, we’re pulling back the curtain on how it’s happening — and what can be done to restore accountability.”

The Cognisense Insights newsletter launches this week and will be distributed every two weeks to subscribers. The newsletter will include deep-dive articles, curated enforcement trends, vendor analysis, and alerts on emerging threats to training integrity.
