Workstatus Adds New Features for Attendance Tracking and Project Control

Workstatus adds selfie verification, email alerts, better time-off tracking, task filters, and cost tracking for improved team and project management.

NOIDA, UTTAR PRADESH, INDIA, June 24, 2025 /EINPresswire.com/ -- Workstatus, the leading workforce management platform, has rolled out exciting new features making it easier for business owners to track teams, manage projects, and stay organized.

Workstatus just upgraded with powerful features for attendance and project oversight.

These updates are intended to help their new and existing clients work more efficiently while keeping costs under control.

 What's New & Updated in Workstatus?

> We listened to our users and built features that solve real workplace challenges. These tools help managers stay informed and teams stay focused"
>
> *Parvessh Agarwal*

1. Selfie Verification for Web Tracker

 Selfie identity verification adds stronger security by requiring face verification each time team members enter or leave the job site.
 This ensures that the right person is working on each task and helps prevent time theft.

 Benefits include:

 Verified identity for every work session
 Reduced buddy punching and time fraud
 Better accountability for remote and hybrid teams
 Automatic photo capture for security records

2. Message Board Email Integration

Message Board keeps managers instantly updated when new message boards are created.
 Team members receive real-time email alerts so important communications never get missed.

 This feature helps with:

 Faster response times to team discussions
 Better project communication flow
 Reduced missed messages and updates
 Seamless connection between email and workspace

3. Time-Off Policy Improvements

 Workstatus now shows clearer labels that reflect the correct units (Days or Hours) for vacation and sick leave tracking. The improvements include:

 Accurate accrual amount displays
 Better policy clarity for HR teams
 Easier compliance with labor regulations
 Reduced administrative errors
 This update reduces confusion and helps with compliance requirements.

4. Everything View Task List gives admins and owners powerful filtering options to view tasks by team, client, project, or individual user. This complete oversight helps managers stay on top of all work activities.

5. Navigation and Access Control features let users pin and unpin items for faster access to frequently used tools and projects. This personalization makes daily workflows more efficient.

6. Mark as Favorite allows users to flag important projects, milestones, tasks, task lists, and messages for quick access later. This organization feature saves time and keeps critical work items visible.

 Key benefits:

 Customized workspace for each user
 Faster access to important projects
 Better organization of daily tasks
 Reduced time searching for work items

7. Resource Billing Cost Tracking

Get precise tracking of total, individual, and time log-based billing expenses. This feature gives business owners complete visibility into project costs and profitability.

 Cost tracking benefits include:

 Accurate project profitability analysis
 Better budget control and planning
 Detailed expense breakdowns by resource
 Improved client billing accuracy

 Why Do Businesses Choose Workstatus?

 These new features add to Workstatus's core strengths that help businesses succeed:

 Simple time tracking that works across devices and locations
 Screenshot monitoring for remote work accountability
 Detailed productivity reports for team optimization
 GPS tracking for mobile and field teams
 Automated payroll integration for easy payments
 Get customizable reports for quick time analysis

"Our goal is to make workforce management simple for busy business owners. These updates give you better control without adding complexity," Parvessh Agarwal added.

All new features are available immediately to existing users at no additional cost. New customers can try these features during their free trial period.
