

Finger Trader enables fast, low-cost deployment of global trading systems for Hong Kong's small and mid-sized financial institutions.

As global financial markets demand greater efficiency and regulatory compliance, small and mid-sized financial institutions in Hong Kong are seeking more agile and cost-effective trading solutions. Developed by Japanbased fintech firm Sargia Inc, Finger Trader is emerging as a go-to platform, offering a modular, high-performance matching engine with a lightweight deployment model for local brokers, market makers, and clearing firms.

Finger Trader leverages standardized

APIs to support global trading across asset classes—including equities, forex, and precious

metals—with millisecond-level matching speeds and seamless integration with existing systems.

Unlike traditional complex and expensive trading systems, Finger Trader can be deployed within weeks and reduce maintenance and operational costs to below 20% of conventional systems—delivering significant competitive advantages.

The platform also features innovative risk transfer mechanisms between market makers, centralized clearing fund management, and complete audit/compliance interfaces to meet rising regulatory expectations.

Sargia Inc stated that it will continue expanding partnerships in Hong Kong and the Asia-Pacific region, offering broader API and SDK access to co-create a smarter, more transparent, and liquid trading ecosystem.
