Seafood is a low-calorie food, which is high in proteins, vitamins, minerals, and essential fatty acids, thereby offering numerous health benefits. The growth of the global [seafood market](#) is driven by increase in awareness about the health benefits associated with seafood. In addition, upsurge in population and extensive availability of different species of fish are expected to boost the demand for seafood during the forecast period. However, depletion of wild stock of fishes in seas act as the major restraint for the market. Conversely, rise in collaboration between manufacturers and food service providers is expected to provide potential growth opportunities for the global market. The global seafood market is segmented into type, application, and region.

Depending on type, the market is divided into fish, crustaceans, Mollusca, and others (roe, marine mammals, and medusozoa). The application covered in the study include retail, institutions, and food service. Region wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

According to the seafood market analysis depending on type, the fish segment led the market in 2019. Non-shell fish is one of the most sought-after fishes for human consumption. The demand for fish is considerably high and has been growing, as more people are becoming aware of the beneficial micro and macronutrient profile of fish, which is a key factor contributing toward the growth of the global market. However, the Mollusca segment is expected to witness steady growth during the forecast period.
