

# Element Fleet Recognized as a Top 50 SDG Leader in Documentary Highlighting Decarbonization and Fleet Sustainability

TORONTO, CANADA, June 25, 2025 /EINPresswire.com/ -- Element Fleet Management Corp (TSX:EFN) ("Element" or the "Company") is honoured to be featured in the Top 50 SDG Leaders global documentary video series. The series profiles organizations across diverse industries who are making meaningful strides toward achieving the United Nations Sustainable Development Goals (SDGs).

“

Sustainability means thinking long-term — making deliberate, responsible choices today that build a better future for generations to come”

*Sheri McGrath, VP of Sustainability at Element*

“Sustainability means thinking long-term — making deliberate, responsible choices today that build a better future for generations to come,” says Sheri McGrath, VP of Sustainability at Element. “We are proud to empower our clients as they reduce emissions, lower costs, and pursue their climate goals. With the right tools, insights, and support, we are helping make the transition to a more sustainable future both achievable and impactful.”

For Element, sustainable fleets are about more than targets — they embody our Purpose to Move the world through intelligent mobility. With over 1.5 million vehicles under management, including 101,000 electric or hybrid vehicles already in operation, Element is championing fleet electrification and other solutions to drive meaningful progress toward decarbonization, [for both ourselves and our clients](#).

“Having a collaborative partner like Element is helping us make tangible progress on our sustainability objectives,” says Luis Torreblanca, Building Segment Manager, ABB Mexico.

Aligned with United Nations Sustainable Development Goal 13: Climate Action, Element has set an ambitious target to transition 350,000 client vehicles to electric by 2030 —demonstrating that sustainability and business success can go hand in hand.

“Fleet electrification and decarbonization do not have to feel overwhelming. We now have so many technologies that allow us to have cleaner mobility, and this is making the transition more scalable and affordable,” says Avninder Buttar, Senior Vice President and Head of Electrification for Element. “Every journey toward sustainability begins with small, measurable steps — and

those steps can start today. Now is the time to invest in these strategies that benefit us all.”

Inclusion in the Top 50 UN SDG video documentary series reaffirms Element’s leadership in aligning fleet operations with climate solutions. With validated near-term science-based targets, and a reduction of its Scope 1 and 2 emissions by 80 per cent since 2019, Element continues to partner with clients to lower emissions across the value chain—demonstrating measurable progress and shared commitment to sustainability.
