

Eylsia, Filipina Singer, Introduces Her First Country Song with Newfound Vocal Ability

PALM BEACH, FL, UNITED STATES, June 25, 2025 /EINPresswire.com/ -- Eylsia, a remarkable Filipina singer-songwriter, is set to make waves in the music industry with her debut country single, "Pull Me To The Light." Her inspiring journey—marked by resilience and transformation—demonstrates how life's hardships can become powerful catalysts for reinvention.

"At ten, I was competing in international tennis tournaments, including Wimbledon and the US Open," says Eylsia. "But after a serious injury, I had to let go of that dream." Pivoting from sports, she transitioned into the corporate world and later became a senior vice president at Deco Disc, a record company that partnered with Handleman, the largest audio-visual distributor in the U.S. at the time.

"The company's CD format featured legendary artists like Stevie Wonder, Paul McCartney, Kenny Rogers, and Luciano Pavarotti," Eylsia notes. "It was an incredible time to be learning about the music industry from the business side."

Despite becoming one of the youngest college presidents in the country, her love for music never faded. "I had success as an executive, but deep down, music was always calling me," she says. That calling grew stronger after she suffered a severe reaction to the COVID-19 vaccine, which left her with permanent vocal damage. "It made me ask, 'Why is medicine always trying to make you normal?'"

Rather than retreat, Eysia explored experimental voice restoration techniques. “I began to imagine a future where I could have a ‘bionic voice’ - something that would help me express my musical compositions,” she explains.

With the support of a specialized medical team and groundbreaking technology, Eysia experienced a vocal recovery that exceeded her expectations. “Honestly, if I had this voice when I was a kid, I never would have done anything else,” she shares.

Her debut country single, “Pull Me to the Light,” is already resonating with early listeners. “It sounds like an instant classic,” says Lisa Pamintuan, president

of [Nicolas of Palm Beach](#). “There’s emotional depth in Eysia’s voice that connects with people immediately.” The track is available on streaming platforms and can be requested on smart assistants like Alexa—though Eysia jokes, “It still can’t pronounce my name correctly!”

“

It’s like I have a bionic voice. I can do anything I want with it. Maybe this is what Elon Musk wants to give people through Neuralink. I hope so, because this feels like a miracle.”

She describes the transformation as nothing short of miraculous: “It’s like I have a bionic voice. I can do anything I want with it. Maybe this is what Elon Musk wants to give people through Neuralink,” she laughs. “I hope so, because this feels like a miracle.”

While fans and critics alike praise her vocals, Eysia remains reflective: “People say I’ll win awards for singing, but I remind them—this isn’t a voice I was born with. It’s the result of science, ambition, and maybe a little bit of God’s hand.”

“Pull Me to the Light” is more than just a debut—it’s a testament to the strength of the human spirit and the possibilities that emerge when innovation and artistry meet. I want this song to give people hope,” Eysia says. “We all go through dark times, but there’s always a path forward—even if it looks different than we imagined.”

About Nicolas of Palm Beach

Nicolas of Palm Beach embodies the global reputation of Palm Beach as the casual luxury capital of the world. Renowned for its exquisite fashion, jewelry, fragrances, and accessories, the brand is part of the Worlddipi.com family of companies. This unique collective merges science, technology, art, and entertainment, fostering synergistic collaborations on projects between its own companies and external partners.

About WORLDIPI.COM

Intellectual Properties International Holdings, WORLDIPI.COM, is a worldwide leader in intellectual property. It represents the intellectual properties and technologies of Donald Spector, who has been called one of the world's most prolific inventors. The company has hundreds of US and foreign patents in medicine, entertainment, communications, technology and consumer products. Mr. Spector has opened up several billion-dollar industries.

The principals of World IPI created the first hydraulic exerciser; the first hyperbaric chamber for seeds and the first ball that lit up at night. Bristol-Myers Squibb set up a separate division for Spector's patents including the first electronic air freshener, the Aroma Disc System.

Spector's patents range from the first known app for location-based advertising; the first known patents for a cyber translation system; patents that predate the wearable biosensor market, as
