

Grass Plus, Inc. Introduces Custom Tracked Hydroseeder for Hard-to-Reach Terrain

Grass Plus, Inc. unveils a custom-modified tracked hydroseeding unit, expanding erosion control capabilities to hard-access terrain in Utah and nearby areas.

EDEN, UT, UNITED STATES, August 1, 2025 /EINPresswire.com/ -- [Grass Plus Inc.](#), a leading Utah-based landscaping and environmental services firm, has announced the launch of a custom-built tracked hydroseeder designed for use on steep, remote, and otherwise inaccessible job sites.

Developed in-house, this modified unit allows the Grass Plus team to perform [tracked hydroseeding and erosion control](#) in rugged terrain where traditional equipment cannot safely operate. This capability is crucial for pipeline corridors, utility ROWs, wildfire reclamation, and mountainous construction projects.

“

This tracked system gives us access to places standard trucks can't go. It's a game-changer for remote and rugged project sites.”

Blake Burhley, Owner of Grass Plus, Inc.

The new system supports hydroseeding, bonded fiber matrix applications, straw mulch, and other erosion control methods while ensuring compliance with federal and state restoration guidelines.

A Word from the Owner

“This tracked system gives us access to places standard trucks can't go. It's a game-changer for remote and rugged project sites.”
