

Avaamo Announces Native Integration of Avaamo Ambient with Epic EHR

Auto-populates notes, orders, and discrete data directly into Epic Hyperspace and Haiku

LOS ALTOS, CA, UNITED STATES, June 26, 2025 /EINPresswire.com/ --

[Avaamo](#), a leader in [ambient](#) clinical intelligence, is proud to announce the seamless integration of its flagship product, Avaamo Ambient, with Epic EHR, leveraging Epic's ambient APIs across both desktop (Hyperspace) and mobile (Haiku) environments. This milestone marks a significant leap forward in ambient documentation—bringing real-time, specialty, and subspecialty awareness

Avaamo Ambient now integrated with Epic EHR

This integration is built on Avaamo's seven-year partnership with Epic, delivering enterprise-grade solutions across patient engagement, care coordination, and AI automation for leading health systems.

Designed for Clinicians. Trusted by Clinicians.

Unlike legacy dictation tools or first-gen ambient scribes, Avaamo Ambient brings a dynamic, context-aware documentation experience to any encounter type. The solution supports a growing range of visit types across multiple specialties—adapting in real time to the nuances of each specialty's workflows and language.

With Epic integration now live, clinicians can:

- Auto-populate notes into Epic in real time with minimal editing
- Place medication, imaging, and procedure orders directly from the conversation
- Capture discrete data into Epic flowsheets, problem lists, and more
- Access Avaamo Ambient in Hyperspace and Haiku, fully embedded in their native workflow

Intelligent Notes, Embedded Where Care Happens

Avaamo's ambient AI goes beyond transcription—it structures, summarizes, and intelligently interprets clinician-patient conversations. Whether a psychiatrist is managing a complex SUD case or a pediatrician is conducting a well-child visit, Avaamo adapts dynamically to produce high-fidelity documentation with less than 1% correction rate in pilot deployments.

The platform also features:

- Built-in ICD-10 assistance
- Specialty-specific templates
- Clinician-preferred writing styles
- Enterprise-grade privacy & HIPAA compliance

Avaamo Ambient is committed to continuously innovating and expanding its capabilities to support a wider range of clinical workflows and specialties. This integration is a testament to Avaamo's dedication to making healthcare technology invisible and assistive, lifting the administrative burden from providers and enabling them to dedicate more time to what matters most: their patients.
