Covid-19 Scenario

□ The COVID-19 pandemic had a significant impact on the retail analytics industry. While some sectors experienced challenges, others witnessed opportunities for growth and innovation. One of the positive impacts of the pandemic on the retail analytics market was the increased demand for e-commerce platforms.

□ In addition, the growing online presence of people after the COVID-19-induced lockdowns and social distancing policies fueled the need for retail analytics solutions. The pandemic caused a significant shift in consumer behavior, with growth in e-commerce and a decline in physical shopping store visits. These factors have propelled the growth of retail analytics solutions among industries.
