Research Methodology:

□ Primary Research: This method involves collecting new and original data for a specific purpose. Primary research is often conducted through surveys, interviews, focus groups, and observation. It enables researchers to obtain first-hand information directly from the target audience, which is especially useful when researching a new or emerging market.

□ Secondary Research: This method involves analyzing and synthesizing existing data from various sources such as industry reports, government publications, academic research, and online databases. Secondary research can provide researchers with valuable insights into industry trends, consumer behavior, and Cannabis Packaging market size and growth, without the need for extensive data collection.

Most research studies use a combination of both primary and secondary research methods to ensure comprehensive and accurate data analysis. The specific methodology used in a Cannabis Packaging market research study will depend on various factors such as the research objectives,

the target audience, and the available resources.
