Prime determinants of growth

The global annuity insurance market is experiencing growth due to several factors such as the rise in awareness and education about retirement planning & income strategies, robust growth in the financial market, and the growing regulatory support and incentives in the insurance industry. However, the high cost of annuities, longevity risk management, and liquidity constraints hinder market growth to some extent. Moreover, a surge in a trend toward financial wellness programs and ongoing strategies for innovative investments in developing countries offers remunerative opportunities for the expansion of the global annuity insurance market.

Based on base oil, the indexed annuity insurance segment is projected to manifest the highest CAGR from 2023 to 2032. This can be attributed to the fact that changing consumer preferences and attitudes toward risk, retirement planning, and financial products influence the demand for the indexed annuity insurance market.

Based on the application, the engine oil segment held the highest market share in 2023, accounting for nearly one-third of the global annuity insurance market revenue and is likely to retain its dominance throughout the forecast period. This can be attributed to the fact that the considerable changes in regulations related to retirement planning, taxation, and consumer protections may impact the availability and attractiveness of annuities in the financial services sector.

Based on distribution channel, the banks segment is projected to manifest the highest CAGR during the period of 2023-2032. This can be attributed to the rising demand for retirement income solutions due to the increase in retiree population, along with the active expansion of financial product offerings, including annuities, across public and private banks. These trends are expected to stimulate the channel of banks in the annuity insurance market.

North America to maintain its dominance by 2032.

Based on region, North America held the highest market share in terms of revenue in 2023, accounting for half of the global annuity insurance market revenue, and is expected to rule the roost in terms of revenue throughout the forecast timeframe. The aging population in North America, particularly the baby boomer generation, is a significant driver for the annuity insurance market. Further, insurance companies constantly innovate to meet the changing needs and preferences of consumers. This includes the development of new types of annuities, such as indexed annuities, offering significant returns associated with the performance of a market index, and presenting potential for higher returns while still offering downside protection.

Players: -

Allianz
Assicurazioni Generali S.p.A.
Equitable Holdings, Inc.
Lincoln Financial Group
MetLife Services and Solutions, LLC
Munich Re
Nationwide Mutual Insurance Company
New York Life Insurance Company
