## Empowering Data-Driven Enterprises with Solix's Next-Gen Solutions

The demand for data-driven decision-making, cloud-first strategies, and AI-powered automation is growing rapidly across industries in APAC. The new Singapore office will serve as a key hub for promoting Solix's flagship solutions:

**Solix Common Data Platform (Solix CDP):** A scalable data management and analytics platform that provides enterprise archiving, data governance, and AI-driven insights. Solix CDP enables organizations to modernize legacy applications, accelerate cloud adoption, and enhance operational efficiencies through advanced data lifecycle management, intelligent tiering, and secure data sharing.

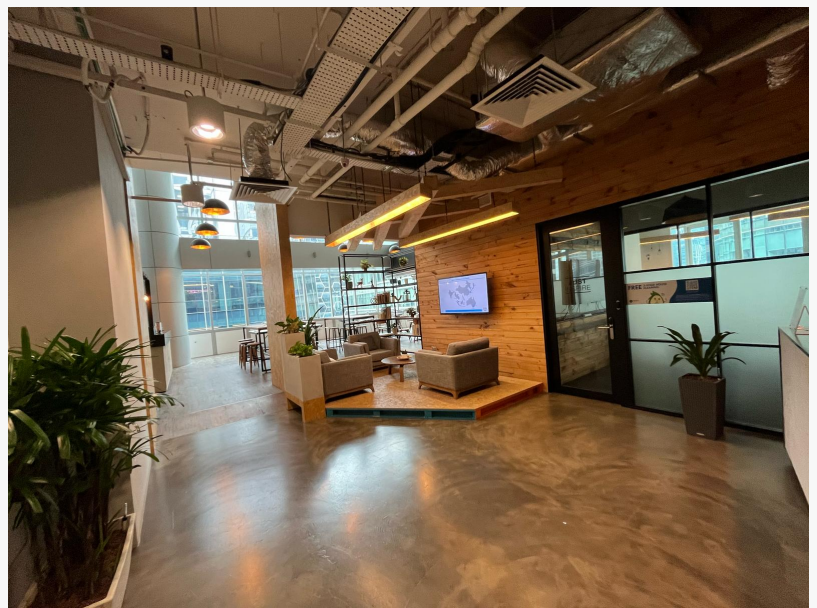

Solix Enterprise Data Lake: A robust enterprise data lake solution designed to ingest, manage, and analyze massive datasets for AI-driven insights. Solix Enterprise Data Lake collects any data, including metadata, from any source, and delivers real-time data pipeline solutions with federated data governance controls—including data security, consumer data privacy, compliance, and Information Lifecycle Management (ILM). It enables real-time analytics, data science workflows, and machine learning applications across structured, semi-structured, and unstructured data sources.

Solix Enterprise AI (Solix EAI): A cutting-edge AI and machine learning platform designed to unlock business insights, automate workflows, and optimize decision-making. Solix EAI leverages Generative AI and predictive analytics for applications such as fraud detection, risk management, and intelligent automation in industries like finance, healthcare, and manufacturing.

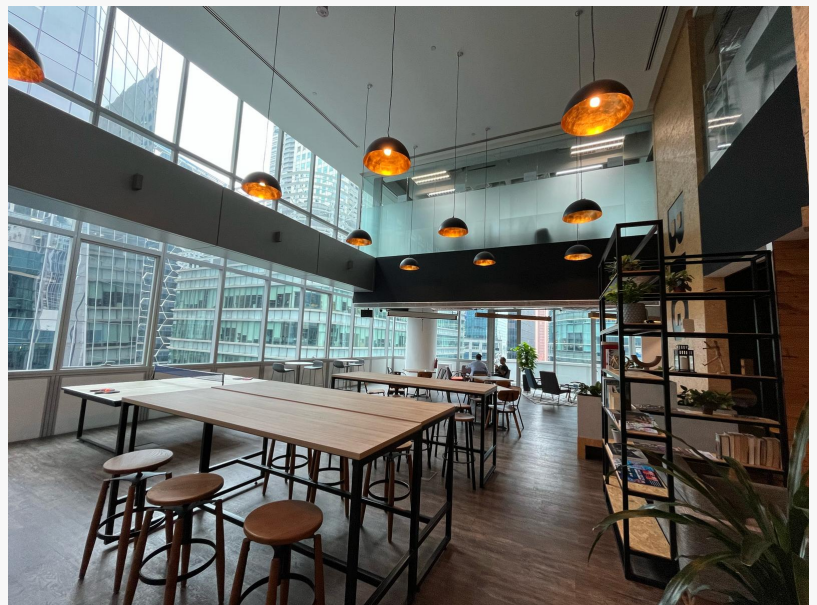

Solix Enterprise Content Services (Solix ECS): Solix ECS is a secure, compliant, and enterprise-ready solution built for modern, digital-savvy work groups. The platform features advanced intelligent capabilities and a unique pricing model to enable a secure and compliant digital content store for all enterprise workgroups.

#### Strengthening APAC's Digital Transformation Landscape

"With the explosive growth of enterprise data and increasing regulatory pressures, organizations in Asia-Pacific need robust data archiving, analytics, and AI-driven decision-making capabilities," said Sai Gundavelli, Founder & CEO at Solix Technologies, Inc. "By opening our Singapore office, we are strengthening our commitment to helping enterprises maximize the value of their data, optimize IT infrastructure, and drive AI-powered innovation."
