Research Methodology

GEC analysts aggregate venture-funding data, patent filings, regulatory clearances, M&A activity and media sentiment. Nominees are scored on:

Market Impact – measurable traction or cost-of-capital advantage

Innovation Depth – novel technology or first-in-class business model

Scalability & Resilience – capacity to outperform across cycles

Societal Benefit – alignment with sustainability or inclusion goals

The 25 highest-scoring nominees are then validated by an independent advisory board of founders, investors and journalists.
