

# Vampa Tire Supplies Introduces Tire Hammer Bead Breaker and Bead Bazooka

*The Bead Bazooka, also now offered by Vampa Tire Supplies, delivers a targeted burst of compressed air to seat tire beads rapidly and securely.*

MIAMI, FL, UNITED STATES, June 27, 2025 /EINPresswire.com/ -- [Vampa Tire Supplies](https://www.vampatiresupplies.com/) introduces two new additions to its tire service equipment lineup: the [Tire Hammer Bead Breaker](#) and the [Bead Bazooka](#). These tools are designed to support technicians involved in the repair, mounting, and maintenance of tires across commercial, industrial, and off-road applications.

The new offerings reflect evolving needs in the tire service industry. Manual and pneumatic tools remain essential in environments where space, speed, and precision are necessary. In particular, the company's recent additions aim to assist tire specialists in managing bead-breaking operations safely and efficiently, without reliance on heavy or powered machines.

**Tire Hammer Bead Breaker: A Tool for Controlled Bead Separation**

The Tire Hammer Bead Breaker is developed for technicians handling large commercial or off-road tires where traditional bead-breaking

Tire Hammer Bead Breaker--

Bead Bazooka.

methods may be either too time-consuming or damaging to rim edges. Constructed for heavy-duty use and portability, this hand-operated tool helps dislodge the tire bead from the wheel using applied force without puncturing or scraping sensitive components.

Key specifications include:

- Durable steel construction
- No external power source required
- Controlled force application to prevent wheel damage
- Designed for use in shop or field environments
- Suitable for use on large truck, tractor, and implement tires

This tool has been used in industries where mobile repairs and roadside servicing are common. In workshops, it may also reduce the need for hydraulic systems or rim-clamping mechanisms when handling specific tire types.

**Bead Bazooka: Supporting Tire Bead Seating with Airburst Technology**

The Bead Bazooka, also now offered by Vampa Tire Supplies, delivers a targeted burst of compressed air to seat tire beads rapidly and securely. It is primarily used to address situations where tire beads fail to seal against the rim during the mounting process, which is common with wide-profile and specialty tires.

This tool's design emphasizes pressure control and technician safety, with attention to trigger release systems and nozzle design.

Functional features include:

- Aluminum tank to reduce tool weight
- Built-in safety trigger for controlled release
- High-pressure output for stubborn or low-profile tire applications
- Compatible with a wide range of commercial vehicle tires
- Designed for quick recharging between uses

The Bead Bazooka continues to be implemented by tire professionals managing fast-paced service bays, fleet repair operations, and off-road vehicle servicing where traditional air compressors may fail to deliver sufficient force in tight timeframes.

Use in Tire Service Operations

Both tools were selected based on their ability to serve multiple functions without the need for powered platforms. They can be operated in workshops, on mobile units, or in remote locations where compressed air or hydraulic assistance may not be readily available.

These tools may be particularly relevant in the following use cases:

- Commercial fleet maintenance
- Agricultural equipment repair
- Roadside emergency services
- Municipal and utility vehicle tire service
- Off-road tire servicing

While bead separation and seating are routine tasks, they require caution and proper technique. Tools such as these are intended to minimize risk while improving technician productivity.

Tool Availability and Access

The Tire Hammer Bead Breaker and Bead Bazooka are now part of Vampa Tire Supplies' regularly stocked inventory. Availability may vary by region, and inquiries can be directed to the

contact listed below. These tools are supplied for use by professional technicians and trained service providers who understand standard safety procedures in tire service environments.

Quotes or demonstrations from tire service professionals are available upon request to support editorial or technical coverage.

### About Vampa Tire Supplies

Vampa Tire Supplies provides equipment and tools for professional tire service operations. The company focuses on functional solutions for mounting, balancing, repairing, and handling commercial and off-road tires. Its product catalog supports tire dealers, repair shops, fleet managers, and field service providers.

The business emphasizes usability and durability in the tools it offers. Vampa Tire Supplies works with suppliers and field professionals to evaluate product performance before recommending equipment for operational use. The company is not affiliated with any single tire manufacturer, allowing it to maintain a broad approach in selecting compatible products.
