What's Driving The Surge In Machinery Leasing?

An important growth driver of the machinery leasing market is the emergence of start-ups as key clients of leasing service providers. Start-ups often grapple with budget limitations and may lack the necessary capital to acquire expensive equipment outright. Leasing provides them with the opportunity to access the machinery they need without a massive upfront investment. This cost-effective approach appeals particularly to start-ups conserving capital for other vital

expenditures like research and development or marketing.
