What Is Driving The [Growth Of The Pest Control Market?](#)

The escalation in recent years can be attributed to health concerns related to pests, agriculture and food supply protection, urbanization and population growth, regulatory requirements for pest management, and expansion of the hospitality industry. The increasing urbanization is expected to propel the growth of the pest control market going forward. Urbanization refers to the process by which rural areas become urbanized as a result of economic development and industrialization. Pest control becomes crucial in managing and mitigating the adverse effects of pests on public health, infrastructure, and the environment during this transformation.
