

Finger Trader Launches Smart Multi-Market Trading Platform With Built-in Compliance and Clearing

AI-powered Finger Trader helps brokers, market makers, and clearing firms trade globally with zero-code compliance.

NEW YORK, ARMENIA, June 29, 2025 /EINPresswire.com/ -- [Finger Trader](#) Launches Global Multi-Market Trading Infrastructure with Built-in Clearing and No-Code Compliance Layer

[Sargia Inc](#) Launches Finger Trader: A Multi-Functional Trading System for Global, Compliant, Multi-Market Smart Trading

Finger Trader Showcases Next-Gen Smart Trading Infrastructure at Global Fintech Expo

Amid rising global demand for compliant, automated, and high-efficiency trading infrastructure, Japanese fintech company Sargia Inc officially launches its flagship proprietary trading system, Finger Trader. This platform integrates a modular architecture, an AI-powered compliance layer, and soon-to-be-released smart trading modules—providing a one-stop solution for small-to-mid-sized market makers, clearing firms, and brokers with rapid deployment, global connectivity, AI compliance, and strategic scalability.

□ Key Features of Finger Trader

Modular Design & High-Performance Matching

Built on a modular architecture with a high-speed matching engine.

Supports standardized APIs and SDKs for easy integration into existing systems.

Reduces infrastructure costs and development time while accommodating multi-asset, multi-market trading needs.

AI Compliance Engine + No-Code Deployment

Embedded AI auditing module automatically generates reports compliant with SEC, MiFID II, MiCA, and other regulations.

Compliance functions can be activated via no-code setup—achieving international regulatory testing in as little as 72 hours, with no need to modify existing business logic.

Risk Redistribution & Centralized Clearing Fund Management

Supports T+0 risk redistribution among market makers, effectively easing margin requirements. Integrated clearing fund management module improves capital efficiency and regulatory transparency.

Global KYC / AML Support

Integrated identity verification modules covering over 200 jurisdictions.

Accelerates cross-border business expansion and compliance with anti-money laundering requirements.

□ Coming Soon: AI Smart Trading & Copy Trading Modules

AI Smart Trading Module

Integrates market behavior analytics, automated strategy execution, and dynamic risk control. Enables users to build data-driven automated trading models, enhancing operational efficiency and reducing human error.

Suitable for professional trading teams and individual investors.

Copy Trading Mode

Users can follow reputable traders with access to real-time performance data, risk management options, and revenue-sharing mechanisms.

Supports multi-market and multi-asset copy trading with comprehensive asset protection and monitoring tools.

□ What Sets Finger Trader Apart

True SaaS Architecture — Beyond Traditional Terminals

Finger Trader is not just a trading terminal, but a full-fledged Platform-as-a-Service (PaaS).

Offers white-label access for market makers, clearing houses, and brokers with built-in modules for signal routing, matching engine, and audit logging.

Uses standardized APIs (REST/WebSocket) to enable seamless integration of market data and order execution.

Multi-Market, Multi-Asset Support — Break Free from Single Market Constraints

Supports trading across U.S. equities, forex, precious metals, digital assets, ETFs, futures, and more.

Allows users to execute cross-market strategies within a single account, enhancing flexibility and diversification.

Provides a broader trading vision compared to single-market legacy platforms.

Transparent Compliance & Open Trust Ecosystem

Built-in clearing fund custody module ensures all client funds are held in regulated third-party accounts.

Provides complete audit APIs for orders and signals, enabling integration with internal or third-

party risk management systems.

Integrated with multiple global compliance providers (KYC & AML), helping clients adapt quickly to international regulations.

Modern UX & White-Label Customization

Offers cross-platform access: Web, mobile app, API, and quant trading interfaces.

Developed with cutting-edge tech stacks (React, Tailwind, SwiftUI, Jetpack Compose) for seamless UI/UX.

Flexible white-label support lets institutional clients customize branding and interface authorizations for faster go-to-market execution.

□ Building the Next-Gen Smart Trading Ecosystem

Finger Trader currently serves 12 licensed market makers across Asia-Pacific and North America and plans to expand to 25 partners by the end of 2025. The platform has opened Early-Bird API Access, inviting global brokers, clearing houses, and strategy developers to join the ecosystem. A spokesperson from Sargia Inc stated: "Our mission is not only to solve the compliance and technical pain points of small and mid-sized institutions, but also to leverage AI and intelligent tools to make trading more efficient, secure, and accessible."
