

CEO of Weber Legal Nurse Consulting Launches Daylong Classes for Medical Professionals Aimed at Reducing Medical Errors

RN and Legal Nurse Consultant Silvia Aninye's Goal is to Improve Communications and Practices in the Healthcare Field to Ensure Fewer Medical Mistakes.

LOS ANGELES, CA, UNITED STATES, June 30, 2025 /EINPresswire.com/ -- Weber Legal Nurse Consulting's CEO Silvia Aninye's first class on the legal aspect of healthcare, "Behind the Exam: The Legal Nurse Consultant's Point of View in Patient Advocacy and Interdisciplinary Collaboration of the Healthcare Team" is set to take place July 2, 2025 in Los Angeles. Healthcare professionals in attendance will earn certified education units. The class, which is customized for clients, will be offered to healthcare professionals throughout California.

“Preventing medical mistakes, improving patient care and reducing the need for legal intervention is what is driving me.”
Silvia Aninye

The class is designed to enhance communication, coordination, and documentation accuracy across healthcare disciplines. It will highlight how Legal Nurse Consultants engage with healthcare professionals to advocate for patients involved in injury claims, workers' compensation or malpractice cases. Attendees will gain insight into the range of services LNCs provide including case management, telephone consults and detailed medical reviews. Aninye will provide proactive strategies to handle potential legal or insurance accusations.

As an RN and Certified Legal Nurse Consultant, Aninye knows firsthand how medical mistakes can happen and the impact they can have on patients, healthcare workers and medical institutions. During her years as a hospital RN, she saw charting mistakes resulting from doctors and nurses copying and pasting patient information rather than manually entering the information during patient exams.

Aninye says, "Preventing medical mistakes, improving patient care and reducing the need for legal intervention is what is driving me. All patients deserve a high and safe standard of care. I

believe healthcare professionals want to deliver just that. With improved communications and a checks and balances system on the healthcare team medical errors can be minimized.”
