

From Azure to M365: CloudIBN Delivers Seamless Microsoft Security Coverage along with cybersecurity services

CloudIBN ensures seamless Microsoft security coverage from Azure to M365, backed by expert cybersecurity services for complete cloud protection.

MAIMI, FL, UNITED STATES, June 30, 2025 /EINPresswire.com/ -- CloudIBN, a globally recognized provider of managed [Cybersecurity Services](#), proudly introduces a powerful new offering: Seamless Microsoft Security Coverage Across Azure and Microsoft 365. This service delivers unified protection for businesses using Microsoft platforms—encompassing infrastructure, identity, endpoints, and cloud apps—without gaps, silos, or complexity.

As organizations increasingly rely on Microsoft 365 for productivity and Azure for cloud infrastructure, securing both environments with a coordinated defense strategy is vital. CloudIBN bridges the gap, offering expertly managed Microsoft Security Solutions that align policies, monitoring, and response across both platforms.

Why Unified Microsoft Security Coverage Is Critical

Security gaps between Microsoft 365 and Azure can lead to:

1. Misconfigured access controls
2. Blind spots in threat detection
3. Inconsistent compliance enforcement
4. Delayed incident response across environments

CloudIBN solves this by integrating Microsoft Defender, Intune, Sentinel, Entra, and Purview

CloudIBN - Cybersecurity Services

across all Microsoft workloads, providing complete visibility, policy consistency, and centralized response.

Managing both Azure and M365 security separately? Schedule a Free Integration Strategy Call

What Does Seamless Microsoft Security Look Like?

CloudIBN's fully managed service connects every layer of your Microsoft ecosystem:

1. Microsoft Defender Suite
2. Defender for Endpoint, Identity, Office, and Cloud
3. Unified security telemetry across devices and cloud apps
4. Real-time threat blocking across users, emails, and infrastructure

Microsoft Intune

1. Mobile Device Management (MDM) across hybrid and BYOD setups
2. Unified endpoint compliance for Azure-hosted workloads and M365 apps
3. Risk-based policy enforcement tied to Defender signals

Microsoft Sentinel (SIEM)

1. Correlates activity across Azure logs, M365 logs, and Defender alerts
2. Automated investigation and incident response
3. Unified dashboards for SOC teams and auditors
4. Microsoft Entra (Identity Governance & Conditional Access)
5. Consistent identity and access policies across M365 and Azure services
6. Role-based access for Azure subscriptions, storage, databases, and Teams
7. Enforces least privilege and Zero Trust models
8. Microsoft Purview (Compliance & DLP)
9. Data classification across SharePoint, OneDrive, Azure Storage, and SQL
10. Unified DLP enforcement for data in transit, at rest, and in use
11. Policy compliance monitoring for GDPR, HIPAA, ISO, and more

CloudIBN's Seamless Approach: How It Works

1. Discovery & Security Posture Analysis

Review of current Azure and M365 configurations, Secure Scores, and identity permissions.

2. Policy Harmonization

Alignment of Defender, Entra, and Intune settings across both environments.

3. Integrated Monitoring

Logs from Azure, M365, and third-party apps ingested into Microsoft Sentinel and reviewed by CloudIBN's 24x7 SOC.

4. Continuous Compliance Mapping

Automated policies mapped to regulatory controls with monthly reporting.

Key Benefits of CloudIBN's Unified Microsoft Security Solutions

1. End-to-End Visibility from Endpoint to Azure Infrastructure
2. Rapid Threat Detection and Response
3. Consistent Compliance Across All Microsoft Services
4. Reduced Tool Fatigue and Alert Noise
5. Strategic Use of Existing Microsoft Licenses

Why CloudIBN?

- Microsoft Solutions Partner – Security & Azure Specializations
- Dedicated 24x7 SOC with certified Microsoft security experts
- 12+ years of experience securing hybrid and cloud-first enterprises
- Trusted by clients in BFSI, legal, education, tech, and government

Microsoft 365 and Azure are powerful on their own—but exponentially more secure when unified through Microsoft Security Services. CloudIBN's seamless Cybersecurity Solutions integrate the full Microsoft security ecosystem—including Defender, Sentinel, Intune, Entra, and Purview—into a single, expertly managed protection fabric.

With 24x7 oversight, intelligent automation, and regulatory alignment, you gain peace of mind knowing that your enterprise is defended everywhere, all the time—across users, devices, apps, and cloud environments. Secure smarter. Comply faster. Respond instantly—with CloudIBN and Microsoft Security Solutions.
