What Is Driving The Growth Of The Neurogenic Detrusor  
Overactivity Market?

Increasing prevalence of neurological disorders, growing  
awareness among healthcare professionals, expansion of

hospital and clinic infrastructure, and increasing rates of diagnosis have all greatly accelerated growth in the neurogenic detrusor overactivity market. Furthermore, it's anticipated that the rise of an aging population, a growing need for treatment of spinal cord injuries, and increasing healthcare expenditure will continue to drive growth over the forecast period.

Another key growth driver in the neurogenic detrusor overactivity market is the rising incidence of neurological disorders. Neurological disorders, which include conditions that affect the brain, spinal cord, or nerves, are witnessing an increase globally as the world's population ages. This
