

Smart Education and Learning Market Growing at 18.4% CAGR | Reach USD 1.4 Trillion by 2032 Globally

WILMINGTON, DE, UNITED STATES, July 1, 2025 /EINPresswire.com/ -- Allied Market Research published a new report, titled, "[Smart Education and Learning Market](#) Growing at 18.4% CAGR | Reach USD 1.4 Trillion by 2032 Globally." The report offers an extensive analysis of key growth strategies, drivers, opportunities, key segment, Porter's Five Forces analysis, and competitive landscape. This study is a helpful source of information for market players, investors, VPs, stakeholders, and new entrants to gain thorough understanding of the industry and determine steps to be taken to gain competitive advantage.

The global smart education and learning market was valued at \$260 billion in 2022, and is projected to reach \$1.4 trillion by 2032, growing at a CAGR of 18.4% from 2023 to 2032.

The surge in demand for online & remote learning tools and favorable government initiatives & corporate funding to promote smart education drive the growth of the market. In addition, an increase in the need for interactive and personalized learning environment fuels the growth of the smart education and learning market. However, a lack of digital literacy and skills and data privacy and security concerns limits the growth of this market. Conversely, the rise in the implementation of AR and VR technology in the education sector is anticipated to provide numerous opportunities for the expansion of the market during the forecast period.

COVID-19 Scenario

□ The smart education and learning market had witnessed stable growth during the COVID-19 pandemic, due to the increased demand for online learning solutions. Educational institutions, governments, and private investors allocated significant funds towards developing and expanding smart education infrastructure. There was a significant rise in investments in technology, software platforms, content creation, and digital learning resources.

□ Moreover, education technology companies were often seen to deploy technologies such as process automation and hybrid learning models to provide improved efficiency and reduce maintenance expenses during the outburst of the COVID-19 crisis.
