

Energy Management Systems Market to Become a USD 161.9 Billion Industry by 2030, Claims Allied Market Research

The report divides the global energy management system market into different segments based on end-user, type, component, application, and region.

WILMINGTON, DE, UNITED STATES, July 2, 2025 /EINPresswire.com/ -- The global energy management systems industry is expected to observe significant growth due to the increase in the proclivity of energy efficiencies and regulatory obligations. Furthermore, emerging economies are expected to create huge growth opportunities in the coming years. However, hidden costs, financial strains, and long payback may restrain the market's growth.

The global [energy management systems market](#) is anticipated to generate a revenue of \$161.9 billion by 2030. The market garnered \$36.2 billion in 2020 and is expected to show a stunning CAGR of 16.2% from 2021 to 2030.

The global energy management systems market also includes a thorough analysis of the prominent market players such as Schneider Electric, Siemens AG, Johnson controls international plc., yokogawa electric corporation, Honeywell International Inc., C3 energy, Gridpoint Systems, Delta electronics, General Electric company, and Dexma.
