

Thermal Spray Coating Market: Assessing Its Key Opportunities and Competitive Scenario, 2025-2027

The global thermal spray coating market is projected to reach \$12.7 billion by 2027, growing at a CAGR of 5.9% from 2020 to 2027.

WILMINGTON, DE, UNITED STATES, July 2, 2025 /EINPresswire.com/ -- Allied Market Research recently published a report on the [thermal spray coating market](#), which highlights the various aspects of the industry. As per the study, the sector accounted for \$8.0 billion in 2019 and is anticipated to gather a revenue of \$12.7 billion by 2027, citing a CAGR of 5.9% during 2020-2027. The report sheds light on the different growth drivers, investment opportunities, and market restraints in the industry to aid companies in understanding the evolving dynamics of the sector

Major Questions Covered in the Global Thermal Spray Coating Market Report

What are the major drivers influencing the growth of the thermal spray coating market?

What are the upcoming trends and developments in the thermal spray coating market?

Which are the leading companies analyzed in the report?

Which segment is expected to dominate the thermal spray coating market?

Analyzing the Latest Trends in Thermal Spray Coating Market

The disposable incomes of the middle-class population have increased gradually in the past few years in most developed and developing countries globally. As a result, the demand for high-end automobiles has also grown, thus contributing to the expansion of the thermal spray coating industry. Rise in adoption of high-performance ceramic coatings for automotive components to increase the vehicle's fuel efficiency has played an important role in the growth of the sector. Furthermore, various advantages offered by these paints, including resistance from corrosion, heat, and abrasion, have improved the revenue share of the market. Also, applicability of thermal spray coatings has increased in the aerospace and defense domain, enhancing the growth rate of the industry.

Industry Updates and Latest Advancements in the Sector

The advent of innovative thermal spray coatings like plasma coatings is one of the latest trends in the industry. Advancements in the field of nanotechnology have further opened new avenues for growth in the industry. Plasma coatings involve the use of small molecules, called monomers, that bond with polymers under specific conditions. These molecules, depending on the requirements and the type of the surface, help create hydrophilic and hydrophobic surfaces. Plasma coatings are widely used in consumer electronics, biomedical manufacturing, textile production, automotive, and aerospace industries.

Top Companies Profiled in the AMR Report

Along with the growth drivers and investment opportunities, the AMR report also highlights the competitive scenario in the thermal spray coating industry. For this, the profiles of the top businesses in the market are also included in the report. The leading companies studied are:

MORGAN ADVANCED MATERIALS PLC

3M, INC.

LINDE PLC

KCC CORPORATION

A&A THERMAL SPRAY COATINGS, INC.

SAINT-GOBAIN

DUPONT DE NEMOURS, INC

COORSTEK, INC.

INTEGRATED GLOBAL SERVICES, INC.

APS MATERIAL, INC.

In conclusion, the AMR report on the thermal spray coating market puts forth a comprehensive overview of the major drivers and opportunities in the industry to aid companies in formulating their expansion strategies. The latest trends and advancements covered in the study help businesses gain a competitive advantage over their peers in the sector.
