

KPIInterface Recognized on the 2025 Channel Futures MSP 501 List for the Fourth Consecutive Year

KPIInterface continues upward momentum as one of the world's top-performing managed service providers

LIMERICK, PA, UNITED STATES, July 2, 2025 /EINPresswire.com/ -- [KPIInterface](#) (KPI), a premier provider of IT and cybersecurity solutions, has once again earned a coveted spot on the [Channel Futures](#) MSP 501, the tech industry's most prestigious ranking of managed service providers (MSPs) worldwide. This marks KPI's fourth consecutive year on the list - an achievement that reflects the company's consistent growth, innovation, and client-first commitment.

Being ranked on the Channel Futures MSP 501 for the fourth consecutive year is a testament to our team's dedication and the trust our clients place in us"

Brian Pickell, Co-Founder and CEO

Now in its 18th year, the MSP 501 is considered the definitive benchmark for performance and impact in the global managed services industry. The list ranks companies

using a rigorous methodology that includes annual revenue, EBITDA profitability, recurring revenue, and innovation in high-demand areas like AI, cybersecurity, and cloud services.

"This recognition is a testament to the dedication and excellence of our team," said Brian Pickell, CEO of KPIInterface. "To be named to the MSP 501 for four years in a row - and to continue improving our position - speaks volumes about our strategic vision and the trust our clients place in us every day."

KPIInterface continues to climb the rankings year over year, highlighting its operational strength and long-term focus on delivering scalable, secure, and forward-thinking IT services to small and mid-sized businesses.

Applicants for the MSP 501 must pass a comprehensive evaluation by the Channel Futures research team and editors. The ranking is based on a proprietary formula that weighs financial performance, recurring revenue health, and the ability to deliver future-ready solutions to clients.

“The MSP 501 is more than a ranking - it is a reflection of the innovation, operational excellence, and customer-first mindset that drives the world’s top managed service providers forward,” said Robert DeMarzo, Senior Director of Informa Channels events and digital content. “Earning a place on this list tells customers, partners, and the broader technology community that these MSPs are leading the way.”

Winners will be honored at the MSP Summit, taking place September 15 to 17, 2025, in Orlando, Florida. This year’s list is one of the most competitive in its history, with average MSP revenue at \$29.4 million and recurring revenue averaging \$16 million.

About KPIInterface

KPIInterface (KPI) is a premier provider of IT and cybersecurity services, dedicated to delivering customized technology solutions for small to mid-sized businesses. Our commitment to service excellence ensures clients can focus on their core activities while we manage their IT and security needs.
