

CloudIBN's Certified Ethical Hackers Now Serving the Indian Market

CloudIBN's certified ethical hackers now provide expert VAPT services in India, helping businesses detect and fix security vulnerabilities.

PUNE, MAHARASHTRA, INDIA, July 3, 2025 /EINPresswire.com/ -- As India faces an unprecedented rise in cyberattacks, CloudIBN proudly announces the deployment of its elite team of Certified Ethical Hackers (CEHs) specifically to support Indian enterprises through its cutting-edge VAPT Services. This strategic move aims to bolster India's digital defenses with world-class offensive security experts who simulate real-world threats and offer highly customized security solutions.

CloudIBN - VAPT Services

CloudIBN's CEHs are now actively conducting VA & PT Audit Services across banking, healthcare, SaaS, manufacturing, and government sectors in India—applying global penetration testing methodologies with a laser focus on India's unique cyber vulnerabilities.

“In today’s evolving digital climate, a team of well-trained, certified ethical hackers is not a luxury—it’s an absolute necessity,” said Pratik Shah, Chief Technology Officer at CloudIBN. “Our Indian customers can now access top-tier hacking talent, rooted in global expertise but tailored to local security challenges.”

The Rise of Ethical Hacking in India’s Security Ecosystem

India recorded over 1.3 million cybersecurity incidents in 2023 alone, with sectors like BFSI, IT services, and healthcare being primary targets. Many of these breaches could have been prevented with thorough and proactive penetration testing by certified professionals.

VA & PT Services—particularly when conducted by Certified Ethical Hackers—provide a dual layer of security:

1. Vulnerability Assessment (VA) to detect and prioritize weaknesses
2. Penetration Testing (PT) to safely exploit these weaknesses before malicious actors do

CloudIBN's CEHs go beyond tools—they bring a hacker's mindset to simulate real-world attacks, unearthing flaws that automated scans miss.

Test Your Security with a Certified Ethical Hacker. Don't let a vulnerability become a breach:

Why Certified Ethical Hackers Make a Difference

Unlike conventional security analysts, CEHs are trained to think like black-hat hackers, but with a code of ethics and corporate accountability. Their work in India focuses on real business threats, including:

1. Mobile and Web App Exploitation
- Zero-Day Simulations
 - Cloud Misconfiguration Analysis
 - IoT Vulnerability Checks
 - Phishing & Social Engineering Tests

How CloudIBN's CEHs Deliver Superior VA & PT Audit Services

CloudIBN's VAPT methodology combines:

- Reconnaissance – Passive and active scanning to map infrastructure
- Enumeration – Identifying open ports, users, services, and platforms
- Exploitation – Manual exploitation using real-world attack tactics
- Privilege Escalation – Simulating lateral movement within a system
- Reporting & Remediation – Actionable fixes with full documentation

Each test is mapped to compliance frameworks like CERT-In, RBI Cybersecurity Guidelines, HIPAA, PCI-DSS, and international standards like OWASP Top 10 and NIST. The result? A complete, India-relevant security audit with executive and technical-level clarity.

India-Focused Expertise Across All Domains

CloudIBN's CEH-led VA & PT Services are available across a wide range of industries in India:

Banking & Financial Services

- Simulates insider fraud and mobile banking threats
- RBI-aligned [VAPT Audit Services](#) for fintech and banks

Healthcare

- Tests EHR systems and patient data pipelines
- Ensures compliance with India's DISHA and international HIPAA standards

SaaS & Tech Startups

- Secures DevOps environments and APIs
- Identifies CI/CD and codebase injection risks

Manufacturing & OT Systems

- Evaluates SCADA networks, IIoT devices, and vendor connections
- Protects physical plant security through cyber simulations

A Penetration Testing Approach That's Built for India

CloudIBN's VA & PT Services in India are backed by a philosophy of "Think Like an Attacker, Act Like a Guardian."

Their CEHs simulate threats such as:

1. Cross-site scripting on Indian payment pages
2. Injection attacks on public sector portals
3. Phishing lures tailored to local behavior
4. Ransomware propagation via shared drives

By mimicking these real-world scenarios, CloudIBN delivers security awareness, compliance readiness, and business continuity in one strategic engagement.

India's Digital Growth Must Be Matched by Security Maturity. As India becomes a global technology hub, it must also become a cybersecurity leader. CloudIBN's deployment of Certified Ethical Hackers to deliver VAPT Audit Services in India marks a powerful step toward that goal. These professionals offer proven penetration testing expertise, real-world attack simulations, and cultural fluency that no offshore team can replicate. With CloudIBN's VA & PT Audit Services, Indian businesses are now better equipped to: Prevent breaches, Meet compliance requirements, Build trust with users and regulators, Protect innovation and digital assets.
