How Big Is The Global Surgical Clip Market Expected To Grow?

The Business
Research Company

The Business Research Company

“

It will grow to \$1.75 billion in 2029 at a compound annual growth rate (CAGR) of 12.7%.”

*The Business Research
Company*

In recent years, [surgical clip market size](#) has experienced rapid growth. A fresh surge from \$0.96 billion in 2024 to \$1.08 billion in 2025 propels the market forward, showing an impressive compound annual growth rate CAGR of 13.0%. The historical growth of this market can be attributed to several key factors such as increased prevalence of chronic diseases, improvements in surgical techniques, rising awareness of postoperative complications, increased hospital infrastructure and

surgical facilities, and a surge in the adoption of advanced imaging and visualization tools.

What Does The Future Hold For The Surgical Clip Market?

In the years to come, the surgical clip market is anticipated to see exponential growth. By 2029, the market is projected to be worth \$1.75 billion, reflecting a CAGR of 12.7%. The forecasted period points to growth driven by rising surgical volumes, a growth spurt in minimally invasive surgeries MIS, an uptick in the prevalence of chronic diseases, increase in bariatric and cosmetic surgeries, and a surge in ambulatory surgical centers. Key trends forecasted in this period include the integration of robotic surgery systems, a shift towards bioabsorbable surgical clips,

rising demand for laparoscopic clip applicators, preference for disposable over reusable clips, and the advent of digital inventory and smart surgical kits.

What Drives The Surgical Clip Market?

The growth of surgical procedures worldwide propels the momentum of the surgical clip market. Surgical procedures - medical operations that involve manual or instrument-based strategies to diagnose, treat, or manage diseases, injuries, or abnormalities - are rising due to increasing chronic disease prevalence, opening the doorway for more surgical interventions to manage complications and improve patients' quality of life. Surgical clips, providing a quick, reliable, and minimally invasive method to close or clamp blood vessels and tissues, aid these surgical procedures. By controlling bleeding, reducing complication risks, and shortening surgery duration, they prove vital in the surgical field. In March 2023, the British Association of Aesthetic Plastic Surgeons, a UK-based surgical organization, reported that 31,057 cosmetic surgeries were performed in 2022. Compared to 2021, this figure marks a 102% rise. Hence, the increasing surgical procedures are significantly contributing to the growth of the surgical clip market.
