What Is Behind Casein Market Growth Continued Growth?

One key driver that stands out is the growing demand for cheese. Cheese, a solid dairy product formed through milk curdling, is increasingly popular due to consumer preference for protein-rich, flavorful, and convenient food options. As casein is the primary protein in milk that

coagulates to form curds, it plays an essential role in the cheese-making process. In fact, according to the U.S. Department of Agriculture, cheese production rose to 22.52 million metric tons in 2024/25, up from 22.3 million metric tons in 2023/24. Therefore, the growing demand for cheese is propelling the growth of the casein market.
