What Is The [Anti-Inflammatory Drugs Market](#) Growth Forecast?

Excitingly, the anti-inflammatory drugs market is anticipated to see even greater growth in the coming years, rising up to \$228.83 billion in 2029 at a CAGR of 10.8%. This increase in the forecast period can be put down to the rising incidence of autoimmune diseases, a growing demand for personalized medicine, an expanding geriatric population, supportive government initiatives, and rising

preference for topical and targeted therapies.

What's Driving Anti-Inflammatory Drugs Market Growth Specifically?

A key factor driving the growth of the anti-inflammatory drugs market is the rising prevalence of arthritis. This condition, an inflammation of one or more joints causing pain, swelling, and

stiffness, typically worsens with age. As people grow older and joints experience more wear and tear, the likelihood of developing arthritis increases. Anti-inflammatory drugs are beneficial in managing arthritis because they reduce joint inflammation and pain, helping patients maintain better mobility and perform daily activities with greater ease, ultimately improving their overall quality of life.
